
GISELLA GRUBER:

Good morning, good afternoon, good evening wherever you may be. Welcome to the EURALO Board call on Tuesday the 30th of November at 18:00 UTC. On today's call, we have Sébastien Bachollet, Anne-Marie Joly-Bachollet, Máté Mester, Matthias Hudobnik, Natalia Filina, Olivier Crépin-Leblond, Pari Esfandiari, Ricardo Holmquist, Yrjö Lansipuro, Roberto Gaetano.

From staff, we have Heidi Ullrich and myself, Gisella Gruber. I hope I haven't left anyone off the roll call.

We don't have any apologies for today's call, and if I could please remind everyone to state their names when speaking for transcription purposes. Thank you very much, and I'll hand the floor back to you, Sébastien.

SÉBASTIEN BACHOLLET:

Thank you very much, Gisella, and thank you for attending this meeting and for your support. Let's try to go quickly to the proposed agenda. It's the same as usual, I will say, we go through the general assemblies, monthly newsletters, outreach and engagement, the meetings, ABRs, and what is maybe quite important is the current election for the Board.

Regarding the general assembly, as you know, we have a meeting on the 14th. We will go through—once again, I will say quickly to the agenda to be sure that everything is under control. I had a few ideas about face-to-face for next year as I suppose that you are also concerned as I am with current situation, therefore we already said a

Note: The following is the output resulting from transcribing an audio file into a word/text document. Although the transcription is largely accurate, in some cases may be incomplete or inaccurate due to inaudible passages and grammatical corrections. It is posted as an aid to the original audio file, but should not be treated as an authoritative record.

few times that in six months, we will have a face-to-face meeting. If it's not going to happen, we have to try to find other solutions. And I had two solutions or proposals.

The first one is hopefully we have the face-to-face meeting, ICANN 74 in The Hague, and we take advantage of that to have our general assembly during this policy forum. If for any reason it's not going to be a face-to-face, we have two solutions. We have one as it was discussed in different arena to organize a small regional meeting and therefore, we could ask ICANN Org and ICANN Board to have the authorization to organize a GA in face-to-face for us and maybe with few other member of the European constituencies who could join us in a regional meeting. That's one idea.

The second one is to keep the budget for fiscal year 23 and if we can organize a meeting during the six first months of fiscal year 23, it'll be okay for this calendar year 22. If not, we will have to organize again like this year, the 14th of December, a virtual general assembly for EURALO.

For the program itself, we need to set up the agenda, and we need also to set up the training for the participants at the general assembly. I will say almost whatever way we organize the meeting, it could be ... Roberto asks if EuroDIG is no longer an option for the AGM. Yeah, I may add that, I was a little bit worried ICANN is not going face-to-face. Okay, I will add that. No problem. I didn't add that because I was thinking that if we don't have face-to-face for a large group, for ICANN, maybe EuroDIG will not be going on. But as soon as Roberto or anything else has the date for EuroDIG 2022, it'll be great and I will add that to this presentation. Thank you, Roberto.

Any question, comments on that? Roberto put, the difference is that while ICANN is worldwide, EuroDIG is European only. Yeah, but it's still a large group. But yes, I will add it. No worries. Therefore, the date 2022 June, I will add that to the presentation. Thank you. If there are no comments, let's go to the next slide, please.

Okay, that's to go as quickly as possible to the virtual general assembly 2021 agenda. We have the standing issue, the staff opening, welcome, confirmation of attending members, proxies and apologies, and adoption of the proposed agenda. And as we don't have any action items from last year's virtual general assembly, we can go to the next slide.

Okay, here we have, I would say, also the usual discussion, presentation of the annual reports, and here, ALS mobilization report and consequences for EURALO. Yrjö has already worked on that. Sorry I didn't work enough closely on that, but I will try to do that before the end of this week.

Then the same topic about mobilization by Roberto Gaetano, RALO individual members, and then the ALS engagement taskforce by Yrjö and Natalia, outreach and engagement strategy, and we have to work on that. We will send you I guess in the next few days a proposal. Natalia has done her job but I hadn't done mine. It'll be sent to staff and Adam Peake as staff reference for outreach and engagement for Europe.

And then we haven't done that in the previous general assembly, but I would like to suggest to go to all the three pillars of At-Large,

Consolidated Policy Working Group, the Operations, Finance and Budget Working Group, and the At-Large Capacity Building Working Group. It's important to do that during the ga as we have left outside of our monthly call all those issues. We do now a monthly roundtable which has a lot of advantages but we don't give inputs each month on the numbers, therefore I think it's important to do that during the general assembly. And I suggest to ask each of the ALAC members to give also a short talk on what they're doing and what they want to do, and whatever. And then a discussion with all the participant, and some votes, adoption of the annual report and the result of the EURALO Board elections and discussion about next general assembly, and Any Other Business.

Do we think we missed something? We need to add one point. Heidi, you ask if all the speakers are confirmed. I didn't ask them. It's a general assembly. They're all members of the general assembly except Adam Peake. I didn't ask him. And the others, if they're not there, they're not there and they will not give a report. But I am sure that Olivier, Ricardo and Joanna will be there. Matthias and Pari also, and I'm sure that Natalia will be there. Maybe I will not be there, but that's another story.

No, we decided not to invite anybody. We have already a two-hour meeting. We don't have any time left for other things. Except if he's talking, I would say, at the same time or during the B5 where we will talk about outreach strategy and monthly report with Natalia and Adam Peake, and we can add Chris Mondini, but no, this general assembly is to try to relaunch, I would say, EURALO and give the good informations.

Yeah, please, can we confirm that Adam will be with us? That will be great. Thank you. Next slide, please. And please jump in if you want to say something and if you disagree with me particularly. No problem. This meeting is for that. We get a very dense newsletter from Natalia covering May to October. Thank you, Natalia. And I am sure that in the next two weeks, we will get the one of November. And with all that, it will allow us, Natalia and myself, to do the annual report of EURALO. Thank you, Natalia, for [the letters.] Next slide, please.

Natalia, if you want to say something, just jump in, please. Here, we are exactly [inaudible] topic that Natalia is taking care, outreach and engagement. We are working on the roadmap. As I say, it's in my courtyard, and all the other topics will be taken into account. We are working on IGF in Katowice. It'll become harder and harder as some people are not traveling, and I don't know if at the end of the day we will have someone from Europe participating, but we try our best to take care of that.

About ALS mobilization, I know that I have in my mails something to take care from Yrjö. Natalia, Yrjö, Roberto, you want to say something on those topics? If so, take the floor.

NATALINA FILINA:

From me, thank you very much for your compliment to myself, Sébastien, but it's more important that at first our newsletter is very informative for some newcomers and our outreach and engagement plan, even if it will be a little bit late, but I think we will have some new approach to the building of our outreach and engagement strategy and

we will implement it. We will define some problems and we will find some solution for it. So we will present an outreach and engagement strategic plan during AGM. Thank you very much.

SÉBASTIEN BACHOLLET: Thank you, Natalia. Roberto, go ahead.

ROBERTO GAETANO: Yes. Just to say that I just got the message from staff and the ALAC chair, so it seems that we are going to push for becoming operational on the recommendation on the mobilization on both mobilization work parties. So I would expect things to move soon.

SÉBASTIEN BACHOLLET: Thank you, Roberto. Yrjö, please.

YRJÖ LANSIPURO: Yes. Hello. As Sébastien said, I sent a couple of pages to Sébastien and to Natalia on how the outcome of the ALS mobilization work party report should be taken into account in our rules of procedure when they are written [inaudible]. It's not very much, but there are a few points that are going to be obligatory, mandatory for the ALSes. So it's important that these are codified in the document that is binding on the ALSes. Thank you.

SÉBASTIEN BACHOLLET: Kiitos, Yrjö. I will definitely try to do my work on your proposal in the next few days. Sorry to be late. Next slide, please. CROP and the discretionary funding. CROP, I don't know when we will be able to use it, and discretionary funding either. We will see next calendar year what we can do with that, if any. So that's the next meeting, today's meeting, IGF, general assembly, and we will try to convene the Board. I suggest if there are any changes to convene the current Board and the next one for [inaudible] of the two boards the 21st of December and then I will ask you to allow all of us to take some rest from EURALO meetings. Next slide, please.

Just to remind you what was our activity during the last month or this month, we had the annual general meeting of ICANN in virtual and the 9th of November—next slide, please—we had a readout. I received some feedback on the readout and I guess for the few I get, it was useful and interesting. Next slide, please.

And one of the questions is, do we try to do this again at the end of the next meeting, or do you want to try to do something different? There is some advantage and innovation in that, but now we are using the 180 seconds quite a lot. I still feel that it's useful, but if you think or if you have other ideas, it would be great. Next slide, please.

Monthly roundtable went well. What I would like to add in this monthly roundtable, I would like to put on one slide all the one we have done, and that's also a question I would like to ask you, it's what we do next calendar year. Do we restart monthly roundtable, do we do something completely different, or whatever? It will be useful to have some thought about that.

Okay, next slide is next meetings as you can see. We know already that San Juan will be virtual. The Hague, we hope that it will be face-to-face, and the one after. And as you can see, usually, it's two years in advance, but now we have the first meeting in 2023 and nothing after yet [inaudible]. Next slide, please.

Okay, that's the three ABR proposals. I know Joanna is working hard on the first one and unfortunately, with COVID situation, she was obligated to cancel the day of meetings she was planning after the IGF in Łódź in her university, and some of us were planning to be at the IGF and at her event, but some of us are not traveling at all and she canceled this. About diversity. I am in the hand of staff on that, waiting for some feedback. And Roberto has done some work on that and it's going ahead. Any comments, question? Next slide, please.

Here, the opening of the ABR for next fiscal year, and we have just a few weeks to go ahead. Heidi, you can give us some input of what we are supposed to do. It would be great if you could do that. Thank you.

HEIDI ULLRICH:

Thank you very much. Just wanted to come back to the current fiscal year 22 ABRs. Roberto, I did receive your e-mail, and because that funding is not within At-Large, it's within the communication department, it's a general fund, I'm going to be working with them to see what we can do. I do want to note that the approval text did state that given that your website is a third-party website, that we're not able to help you with that. But we are going to look into the welcome [pack,] the individual application process. So there are a few things that we can

help you with. But I'll send you some details once I have more information on that request.

For fiscal year 23, I'm not sure how many of you were on either the joint OFB FBSC, which is the Operations, Finance and Budget Working Group and the Finance and Budget Subcommittee [last week or today's] presentation on the fiscal year 23 ABR process. But this page, if we could somehow—Gisella, are you able to share that link by any chance?

I think most of you are familiar with how the At-Large community handles their additional budget requests or ABR proposals, and it's sort of an added layer of activities than the regular ICANN process, and that basically has to go through your RALO and then to the Finance and Budget Subcommittee for review.

And you can take a look at this process—there's a separate timeline that everyone needs to follow within At-Large. So right now, where we are is that you've received the information, an e-mail was sent out I believe a week or so ago with this workspace, with the timelines in it. The next steps basically are for you to start thinking about your proposals. Definitely recommend that you work with your GSE team, you work with At-Large staff as well to start developing some of these possible proposals for next year, and then I believe on the 7th of January is the deadline for having those submitted to the FBSC and they'll start reviewing them.

The good news is we just received information that you're going to receive shortly, is that the overall deadline for proposals, submissions, is now the 31st of January, not the 24th. So that does give us a bit more

time, and particularly, it gives time for the ALAC to have a look at proposals on their meeting on the 25th.

So here you see it's launched. It's over to you. You should be now, again, as I mentioned, in that stage of development. And again—I'm just making sure that I've memorized these. So the 7th is when you need to have those into the FBSC and that the RALO—Sébastien and Natalia, you're the ones who should be sending that—once you looked at it, once the RALOs looked at them, then send them to the FBSC. And then the FBSC is very active through January and there'll be a process of initial review, any feedback will be sent back to the person who proposed the ABR, you'll have a chance to review and resubmit, and then a final review of the ALAC on the 25th, FBSC will have one final look at it and then staff will submit it on the 31st. So we'll update that date shortly.

And again, it goes through that internal review. During ICANN 72, there'll be a chance for you to discuss that with the finance team, planning team, and then it goes to the Board within the fiscal year 23 budget and once they approve that, then we'll get that information on which ones have been officially approved.

So that is that information. I have been in touch with Joanna. I believe that she's thinking about doing a follow-up to her ABR this year on DNS abuse. I understand that the ABR on the end user survey will likely have another proposal for that one, a more advanced, deeper proposal for that survey. But Sébastien, I think that is where we are with the ABRs. Thank you.

SÉBASTIEN BACHOLLET: Thank you, Heidi. Any comments, questions? Okay, as you see, the date to deliver something to EURALO is quite short, therefore if you have any ideas, please start to share among the EURALO Board members. Even if it's just one idea and not yet the complete proposal, some of the Board members have some ideas on how to help with that. We'll be very happy if Joanna can have the next year a follow-up.

I would like to have some follow up on diversity, but as we are stuck somewhere in middle of nowhere, I would like first to finish this part before to ask another help for that. And for individual member association also, we need to see what's going on and what we can do.

As we have a lot to do to terminate these ABRs this year, I am not seeing too much new proposal, but I hope that somebody will contradict me on that and send some good ideas. Heidi, please.

HEIDI ULLRICH: Thank you. Just a follow-up, Sébastien, on diversity. I have been in touch internally and I'm hoping even today to have some updates for you. Once that—hopefully that update will allow us to move forward quickly with this one, and as I mentioned, Roberto, I'll hopefully get feedback on yours, and then Joanna and I held a call last week, she submitted earlier a wish list of activities. So there is a possibility of holding a symposium, and that might be towards the end of the fiscal year. And we did discuss the possibility that that might be even connected to the face-to-face general assembly, and it would be a symposium, a roundtable. So that might be a really good connection. I'll link you to

have that GA—not only have that training that you all have, that you get that extra day for training, but now you might also have a symposium which would really, I think, be a big draw wherever you decide to hold it. Thank you.

SÉBASTIEN BACHOLLET: Thank you. Happy to learn that a lot of things are going on through EURALO [inaudible]. If you can put in copy the secretariat and the chair of EURALO, it would be great. It will allow us to have some perspective of what we are doing all together in EURALO. Next slide, please.

Okay, as you know, we have MoU with RIPE and CENTR. Lutz, you were at the RIPE with your own hat, but do you have something you can tell us who could be useful for us to know from the RIPE meeting? I guess it was two days ago.

LUTZ DONNERHACKE: Yeah. There's nothing special. I had very limited time to participate. But it's a technical meeting, so there was a better—I have not participated in any session which has a political issue or governmental issue. So I have nearly nothing to report here. Sorry.

SÉBASTIEN BACHOLLET: Don't be sorry, please. I am happy that you report that, you have done what you could be doing. I think it's important that whatever your other hat is or was or will be, you are also the eyes of EURALO, and that's very important. Therefore, don't apologize. I would like to thank you. Natalia, please.

NATALINA FILINA:

Thank you very much. Sébastien, I have sent to you and others our [own] plan to enhance our activities with our MoU partners, but I think maybe it's not just our side to propose it. Maybe we wish or we can ask about some proposals from our MoU partners. Maybe we can start our discussion via e-mails or we can have maybe in January at least virtual meeting and discuss what we can do during next calendar year, for example, because we may wish a lot of things to do together, but what we have from RIPE and CENTR, we don't know.

SÉBASTIEN BACHOLLET:

I know, Natalia, it's something we need to take into account. And maybe it's complicated because if we tell them that we have a general assembly and we invite them, we need to find a few minutes for that and that means that we will shorten the time for discussion with our member, and at the end, if we are just giving lecture to our members, it's not good either and we can't do more than two hours of meeting.

Therefore, maybe one way could be to have in one of our monthly EURALO meetings, maybe we can transform—and it's just ideas and not anything else, but transform one of the monthly roundtable, could be with our MoU partners and could be an interesting way to go. Do we do that with both of them at the same time, or two? Maybe two would be better, but your inputs will be useful. If you think it's a good idea, please tell us. Next slide, please.

Then the election of EURALO Board. Olivier, sorry, go ahead.

OLIVIER CRÉPIN-LEBLOND: Thank you. Sorry for coming in late just on the RIPE and CENTR. Just to remind you, we do have a better relationship with RIPE than CENTER in that the MoU with CENTR took a lot of time and we still haven't got actual access to CENTR meetings. But with RIPE, we do have access to RIPE meetings. We are invited to participate, etc. So this is why I think it's important maybe, if we are to do things, let's rekindle the relationship with RIPE as a starting point. And I should also remind you that there are some people that are involved in At-Large that are also involved in RIPE. I would say Desiree Miloshevic being one of them. But I know that she's also on the GNSO Council now. She's one of the co-chairs of the RIPE cooperation working group. Thank you.

SÉBASTIEN BACHOLLET: Yes. Thank you. And definitely, you summarized the situation well. We didn't get observer membership at CENTR. I think it may be a good idea to relaunch that and to do that maybe this—if we have a call with them, as I suggest in replacement or [another] monthly roundtable could be a way. But yes, definitely, it's much easier with RIPE and with CENTR, and that's okay. And Desiree and Lutz are participating, and that's good. Definitely. Yes, Desiree is now by Nominating Committee member of the GNSO.

Thank you, Olivier. Next topic is the election. As of now, I guess we don't have any candidates. As some of the current Board members are on this call, do you wait for the last minute, or do we need to consider

that you will not send your candidature? Or do you need some more inputs?

And before I give you the floor, I would like to—not for this year, because for this year we have—if I am not mistaken, but Olivier and staff can control what I will be saying, that we need to elect at least three members of the Board this year. Therefore, we need to have three candidates.

But for next year, I would like us to consider—and it must be discussed within the [inaudible], but it's just to put to the table an idea, is that if someone want to become EURALO Board member, they need to take another duty, whatever member, participating of a PDP, of a working group or be members sent by ALAC or EURALO to some ... and for example—sorry, Lutz, to take your name, but you are currently Board member but now you are one of the representatives from At-Large in one of the PDPs. And therefore, from my point of view, you must be ex officio EURALO Board member [at the other.] Therefore, in the absolute, you don't have to put again your name, but as I say, we need three names. Therefore, anyone who could—just to be on the [smooth] regarding our bylaws, and we will change them. Lutz, please go ahead.

LUTZ DONNERHACKE:

I assume that several Board members will be nominated by other people. From my side, I expect that somebody will nominate me. So I do not do it myself.

SÉBASTIEN BACHOLLET: That's a good way. But as I just told you, I consider from my point of view as we have as a way to do it the last year, the one in charge of one project within ICANN are in fact ex officio Board member. But I heard your point.

If Máté is still online, are you on the same way as Lutz? I will ask you another way. If you put your name, you will be happy or unhappy?

MÁTÉ MESTER: Thank you, Sébastien. I'm always happy to put my name anywhere. But at the same time, I definitely struggle with freeing up enough time for EURALO Board. This is why I don't think it would be a very responsible move to nominate myself, neither do I think that I should have enough time in the future—at least in the near future to contribute the way that I should, so I'm hesitating whether I should do it for the next period or not. But I would rather say that I don't think this is the right time for me to contribute to EURALO Board in the future.

MÁTÉ MESTER: But I would rather say that I don't think this is the right time for me to contribute to EURALO Board in the future.

SÉBASTIEN BACHOLLET: Okay. Thank you, Máté. I'm sorry. I don't ask Anne-Marie because I know the answer. But if she wants to say something, she can do it. Okay. Next slide, please.

Okay. Then, you see the current names. We need at least three candidates. And as I [had notes], I will do my part of the work just after this meeting. Thank you very much. And if you want to have other candidates, please put their name, too. Next slide.

Okay. So wait for confirmation. Just the one before, please. You know that we have confirmed—the one after—we have confirmed Anne-Marie as the SC representative from EURALO. Next one, please. And we have confirmed Matthias and Ricardo as representing within the FBSC. And thank you, both of you, to be in those groups. Next slide.

Okay. I will stop here. Roberto asked me. He wants to know the answer. For the moment, she is reluctant to put her name again to the EURALO Board. Therefore, I don't think. And the other reason was we were expecting another young Frenchman to put his name. But unfortunately, he didn't do it and he's not participating. I am sad about that but that's the situation. We will see.

Okay. I will not go through the next slide. It's an update—or I would like to update it with the name of each people, participation. Here, it's updated. But the next one about each working group, it's not updated at all. Therefore, I need to do my work on that with the help of Gisella. And maybe if you know that your name, in some or in one working group, please send that to me, like that I will have an update presentation, and like that I could send this document to—add that to our annual report, like that people know where we are with the participation.

Roberto is asking we may have a short discussion of the Board e-mail list to figure out what is preventing more people to put their candidature. Yeah. No problem with that, Roberto.

But my feeling ... And it's why I am suggesting that we may not need to organize election. But if someone wants to take a position, they need to be associated with participation in any one of the working groups, PDPs, or whatever within ICANN. In one way. I suggest that EURALO Board become a place where we coordinate our work within ICANN, within At-Large, in the different arenas. But once again, it's just a suggestion. Therefore, a short discussion could be good. Roberto, yes, please.

ROBERTO GAETANO:

Yeah. So if I understand correctly, you are proposing a Board of ex-officio members—something like this. So by the function that you have, you then get into this coordination body, where we share the information that are coming from the different ... I see your point. So basically, we will have ex-officio Board members. That's your proposal.

SÉBASTIEN BACHOLLET:

Yes. That's my current thinking. Yes. I think it would be a good way to go. But yes, definitely. That's well-explained by Roberto what I was in mind. Thank you. Okay. If you have any other business, it's a good time. Matthias, please go ahead.

MATTHIAS HUDOBNIK:

Thanks, Seb. I just want to let you know that I will also participate in the IGF. So I got asked to participate in a panel, Panel 13. The topic is the

Digital Transformation Challenges in Developing Countries. And yeah. So I'm very delighted to participate in. It's organized by Olga Cavalli. And yeah. I've very much looking forward to it. Vint Cerf is participating, and Miguel Porrua, and Ndeye Maimouna, and Gitanjali Sah. I think it will be very good, also, for us that we have some ALAC person on it. And yeah. I'm very grateful and thankful that I got this opportunity and I just wanted to let you know. Thank you.

SÉBASTIEN BACHOLLET: Good. But you will be online or you will be onsite?

MATTHIAS HUDOBNIK: No, no. I will be just online.

SÉBASTIEN BACHOLLET: Okay. Thank you, Matthias. I guess staff will be in contact with you to add your name in the right page for IFG Outreach and Engagement and participation. It will be good to have this. For example, the people who will be onsite know that somebody from At-Large/ALAC will talk in this specific section and we'll be able to either [populate] them, or to give some information to the people onsite or whatever. That will be good. Thank you, Matthias. Olivier, please.

OLIVIER CREPIN-LEBLOND: Thank you very much, Sébastien. Since we are speaking about the sessions that somebody will be participating in, I shall be co-chairing and currently organizing the session on the Dynamic Coalition on Core

Internet Values that will take place on the Friday at 8:30 UTC, which is 9:30 AM for most of Europe. We're going to be talking about the Core Internet Values one year on and how the Internet has changed in the past year due to the pandemic. And we will be touching on regulation, with the flurry of new regulations coming in.

We've got a very interesting panel that we'll put up shortly. And you'll see we've got a mix. Hopefully, we'll get some very healthy and punchy discussions going on in there. People have very different views on our panel, which is great. We just hope that, because we're running everything remotely, we'll be able to contain everyone. I don't think anyone will be ... We'll have one participant that will be there locally.

The second thing I wanted to mention was that there's also the much-awaited return of GEMS, the GlobalEqual MultiStakeholder band. Well, it's not going to be the full GEMS. It's going to be a very cut-down version of it, led by Thomas Schneider on the guitar. Unfortunately, most of the other musicians were not able to make it. But there will be a mix with some local people, including the director of the ministry that is running the IGF, who will be on drums.

So that's likely to be a very interesting night. I think it's on the Wednesday. And my understanding is that they will be broadcasting this live also, worldwide, hopefully. I hope that they will do that because I certainly want to see how it all comes out. There will be seven people in total that will be playing for a short amount of time. But the rest of the time, there will be a professional band that will take everybody through the evening. That's it. Thank you.

SÉBASTIEN BACHOLLET: Thank you, Olivier. And just, first [inaudible], not to answer your mail about this Internet Coalition meeting but also to inform you that we just ran, last week, on the Thursday last week, French IGF. And we have two sessions, the first one with the chair of three of the regulators in France, [inaudible], who's in charge of telecommunications; the one in charge of television, and of Internet, but not the content of the Internet, but the content of the television, CSA; and the one in charge of the private data. And it was really an interesting first roundtable.

The second roundtable was more about multistakeholder model and it was also very, very interesting with one representative from ISOC [world], Chris Mondini from ICANN, the French ambassador of numeric, and the last one was ... What was? Yes, from the European Commission. And all that could be very interesting and useful to give some short report to your session. Maybe I will put you in contact with Lucien Castex from Afnic, as he will be in Katowice. He could be a good conveyer of what happened in the French IGF. I could do that remotely. But as you will be onsite, it may be more interesting. Thank you.

Yrjö, please. And sorry to take the floor without asking for. Yrjö, please.

YRJÖ LANSIPURO: Yeah. Thank you, Sébastien. At IGF, I'm taking part at the EuroDIG networking event on Friday lunchtime, if it takes place because it seems that most people who were going to be there, including me, are now canceling the physical trip to Katowice. But we'll try to do it online. Thank you.

SÉBASTIEN BACHOLLET: Thank you, Yrjö. And I am happy that we have a few of us involved in the World IGF. Thank you very much. Please, when you have the opportunity, bring the flag of EURALO, and of At-Large, and end users more generally. It will be great. Okay. I guess, Yrjö, your current was before. Any other speakers or any additional points? If not, we will finish just on time for one-hour meeting. Thank you very much.

For the ones traveling to Katowice, please, once again, bring the flag of EURALO. But more than anything else, take care of you and of your health. We hope the best to you. And all the others who will participate online, please, if you have some summary, I am sure that Natalia will be very happy to get them for the December monthly newsletter. Don't hesitate to send any information you have. And as it asks in the chat, if the one participating to any type of meeting during the IGF, please send that both to staff. It will be useful.

Once again, thank you very much for you time and your commitment. Take care of you and your close ones. And talk to you at the General Assembly. Thank you very much. Have a good evening and good day for the ones who are far from Europe. I see at least two of them. Thank you very much, ladies. Bye-bye.

GISELLA GRUBER: Thank you, everyone. The meeting has been adjourned. Please don't forget to register for the General Assembly. Thank you and speak to you soon. Bye-bye.
