Title:	**EPDP - Internationalized Domain Names (EPDP_IDN)**
Description & Scope:	On 20 May 2021, the GNSO Council passed a resolution to initiate the Expedited Policy Development Process (EPDP) on Internationalized Domain Names and adopt its charter. The EPDP Team is tasked with providing the GNSO Council with policy recommendations on: 1) the definition of gTLDs and the management of variant labels; and 2) how the IDN Implementation Guidelines, which Contracted Parties are required to comply with, should be updated in the future.

Status/Health Rationale:

- This project was initiated on 20 May 2021 and continues with a Status of "On-Schedule" and Health of "On-Target".

Current Activities:

- Complete the first pass of substantive deliberations on Group 1 charter questions related to the definition of all gTLDs using the Root Zone Label Generation Rules (RZ-LGR) and review draft outcome language.
- Complete the first pass of substantive deliberations on Group 2 charter questions related to the "same entity" principle at the top-level.

Planned Activities:

- Initiate deliberations on charter questions in Group 3 related to the objection processes, string similarity review, string contention resolution, reserved strings, and other policies and procedures, as impacted by variant labels: E1-E5, E7, D2-3.
- Survey a subsect of Chinese and Arabic gTLD registry operators to understand their interest/demand for variant labels of their existing gTLDs.
- Consult with Chinese/Japanese/Korean Generation Panels on single character gTLD related questions.

Open Issues, Risks & Mitigation Plan:

- Leadership proposed change to sequencing of tackling charter questions to ensure that a logical order is being followed and provide efficiencies to deliberations. Leadership also intends to revisit the project plan to assess whether the original planning assumptions were reasonable. Council will be informed if any changes to the timing of milestones are considered necessary.

- At the time the Charter was developed, it was assumed that the SubPro recommendations, particularly those relating to IDNs under Topic 25, would have been approved by the ICANN Board. The IDN EPDP is conducting its work with the expectation that the SubPro recommendations will be approved by the Board at some future date. However, it has been necessary for the EPDP Team to make assumptions about the implementation of those recommendations in order to address the Charter questions. While these assumptions are believed to be sound, the Council should be aware of the possible ripple effect or potential risk to the EPDP Teamwork in the event that the Board does not adopt the related SubPro recommendations.

Completed in prior period(s):

- Largely completed the first pass of deliberations on Group 1 charter questions, with draft outcome language developed for seven out of ten questions.
- Largely completed the first pass of deliberations on Group 2 charter questions.
- Completed and distributed Project Package for March.
