ICANN Policies: Protecting the Rights of Registrants and End Users for a Secure and Stable DNS

Brief Description / Brève description / Breve descripción *

The session will attempt to explore how ICANN policies are effective in upholding the rights of registrants and end users. The session will first try to define the rights of registrants and end users as incorporated in ICANN Bylaws and included in community policies and practices. Secondly, the session will highlight current policies under development such as the subsequent procedures for new gTLDs, the transfer policy, the EPDP on gTLD registration data and the EPDP on IDN gTLDs and show how these policies can serve the rights of registrants and end users.

Rationale/Desired Outcomes - Justification/Résultats souhaités / Justificación/Resultados deseados *

The session aims to highlight the importance of end users and registrants rights to maintain a secure and stable DNS and help At-Large and the ICANN wider community to understand how to consider those rights when developing ICANN policies.

Which, if any, other community groups do you plan to involve in your session? Please explain your plans for working cooperatively with the group(s), including your contacts, skill sets sought, etc. *

ICANN org., gNSO, ccNSO, ICANN board and At-Large
