Internet overview for Policymakers and Business Leaders and DNS Experts

Brief Description / Brève description / Breve descripción *

An ICANN Learn session without the word 'learn' in it, a session for all participants that is NOT in a classroom setting, very different from topics such as "DNS for beginners", but essentially a session(s) with a total span of about 3 hours, not lectures, not details, not whole lessons, but a session that would flow like an interesting documentary movie spanning developments from the origin of the Internet, on to current developments such as Meta, Crypto, neural networks, quantum computer, Interplanetary networks, also non-technically touching upon the advances in the evolution of the multistakeholder process etc.

Rationale/Desired Outcomes - Justification/Résultats souhaités / Justificación/Resultados deseados *

Better understanding of the Internet and added clarity by stakeholders including Government/ Business stakeholders on policy matters.

Which, if any, other community groups do you plan to involve in your session? Please explain your plans for working cooperatively with the group(s), including your contacts, skill sets sought, etc. *

ICANN Learn / ISOC learning, established summer schools, but all with a caution that the session ought to be far different from the usual topics and structure of the learning platforms / summer schools.

Session Leaders/Facilitators and Panelists/Presenters - Facilitateurs de session et présentateurs - Líderes de sesión/facilitadores y panelistas/presentadores *

To be discussed. A past Board member, Wolfgang Kleinwaechter may be in a position to offer insights on a proposal like this.
