VIRTUAL COMMUNITY FORUM

ICANN AT-LARGE

Protecting the Rights of Registrants and End Users for a Secure and Stable DNS

- Objective: This session will shed light on rights of registrants and end users and the importance of upholding those rights for the security and stability of the Internet
- Other possible outcomes: A research paper on the topic
- Format: Three round table discussions

ICANN AT-LARGE

Protecting the Rights of Registrants and End Users for a Secure and Stable DNS

Round Table 1: Internet Users' Interests

- According to ICANN Bylaws, how do end users participate in ICANN work?
- Through At-Large the capable part of the user community can submit ideas and take positions. How can we define those positions?
- What tools could help At-Large define Internet users interests?
- What is the importance of safe-guarding Internet users' interests for a secure and known future Internet?
- With the understanding that rights are necessary to protect interests, is it possible/beneficial to translate Internet users' interests as they relate to ICANN into rights?

Round Table 2: Registrants' Rights

- What are the rights of registrants as incorporated in ICANN's Bylaws?
- To what extent are those rights considered at ICANN?
- In your opinion, are current rights protection mechanisms adequate to maintain a secure and stable Internet?
- Going forward what does ICANN need to do to further enhance registrants inclusion in ICANN work?

Round Table 3: ICANN Policies - Upholding registrants and Internet end users interests to continue to provide a secure, known future Internet

- Please pick any ICANN policy that has either concluded or is still under development and discuss how the policy upholds the interests of users and registrants and the impact of this on the DNS ecosystem
- Please provide some general thoughts on the future of registrants and Internet users' interests and how they will continue to provide a secure and known future Internet
