

GNSO Small Team DNS Abuse Questions

Jonathan Zuck

1. Can you please provide further details on what specific problem(s) policy development, in particular, would be expected to address and why you believe policy development is the right mechanism to solve those problems?
2. What do you believe are the expected outcomes if policy development would be undertaken, taking into account the remit of ICANN and more specifically GNSO policy development, in this context?
3. Does the ALAC have any expectations with regards to possible next steps the GNSO Council could or should undertake in the context of policy development?

1. Can you please provide further details on what specific problem(s) **policy development**, in particular, would be expected to address and why you believe policy development is the right mechanism to solve those problems?
2. What do you believe are the **expected outcomes** if policy development would be undertaken, taking into account the remit of ICANN and more specifically GNSO policy development, in this context?
3. Does the ALAC have any expectations with regards to possible **next steps** the GNSO Council could or should undertake in the context of policy development?

2 Important Findings

- maliciously registered
 - 75% of phishing domains and
 - 59% of malware domains
- Euro ccTLDs have the lowest rates of abuse

Recs for GNSO

- Bilateral Discussions with Org on “Bad actors”
- Establish Abuse rate thresholds
- Establish Incentives for Staying below
- Establish penalties for failure to stay below for a long time
- Code of conduct on Data processing, timing of response, etc.
- Explore predictive analytics (a la .EU) and possible investment by ORG
- Friction for bulk registrations
- Explore inclusion of hosting providers
- [not all one PDP]
