IDN Tables

Subgroup Variant Management

Use cases IDN Tables

Fast Track Process

- Use case 1: IDN Table needed to ensure selected string contained IDN characters
- Use 2: Indication of character set allowed for registration under selected string.

Required to submit an IDN Table in IANA Repository for IDN Practices in accordance with procedures for the IDN Repository

(see: https://www.iana.org/help/idn-repository-procedure)

Note : main purpose of the repository is to encourage re-use and analysis

Overall Policy

- Use case 1: Overtaken by RZ-LGR recommendations
- Use case 2: Required to submit an IDN Table in IANA Repository for IDN Practices in accordance with procedures for the IDN Repository?

(see: https://www.iana.org/help/idn-repository-procedure)

Assuming IDN Table is required, what are requirements under ccNSO Policy?

- When submiting an IDN Table strongly advised to meet requirements IDN Guideline v4.0 and subsequent Guidelines ?

NOTE: IDN Guideline v4.0

The main audience of this document is Top-Level Domain (TLD) registries that offer or plan to offer registration of IDNs under their Registry Agreements. For other registries (e.g. Country Code TLD registries) this document is intended as the best current practice. These Guidelines are also intended for registrars offering registration of IDNs.
