# ODA Small Team

## Scope of Small Team

- Whether the ODA has correctly interpreted the intent of the SSAD recommendations in the proposed implementation;
- Whether the ODA has overlooked any key aspects of the SSAD recommendations that should be factored in by the ICANN Board when it considers the recommendations;
- Its view on the concerns identified by the ICANN Board and potential options that could be considered, either in the form of changes to the proposed implementation or the policy recommendations themselves, to address these concerns (note, these are expected to be high level suggestions at this stage);
- Any other aspects that help inform the Council's deliberations and consultation with the ICANN Board.

Whether the ODA has correctly interpreted the intent of the SSAD recommendations in the proposed implementation;

Whether the ODA has overlooked any key aspects of the SSAD recommendations that should be factored in by the ICANN Board when it considers the recommendations;

- Items missed or mis-interpreted (unclear to what extent they impact assessment)
- ODA does not provide enough information to allow for approval with a high confidence level

Its view on the concerns identified by the ICANN Board and potential options that could be considered, either in the form of changes to the proposed implementation or the policy recommendations themselves, to address these concerns (note, these are expected to be high level suggestions at this stage);

Any other aspects that help inform the Council's deliberations and consultation with the ICANN Board.

- Team considering recommending that the GNSO suggest to the Board to pause consideration of the SSAD and implement a “Proof of Concept” (PoC)
- AG: PoC a poor choice of name
- Effectively, the PoC is the “Ticketing System” that the ALAC (and others) recommended.
- Unclear to what extent we can mandate that the PoC be used by contracted parties.

# Accuracy Scoping Team

- Gap Analysis: What information do we need to properly assess the situation (both for this Small Team and on an ongoing basis)
- Defining current accuracy requirements (formerly: Definition of Accuracy)

# PoC - Continued

- Unclear whether the PoC could really be built quickly and for a reasonable cost
- Unclear whether the Board is willing to do so at no cost to users
- If used (by requesters and Rr/Ry) would provide information on whether requests are being satisfied and timing.

# Preliminary Report to Council
