

I have been a member of the ICANN APRALO since 2010. With ICANN, I represented the APRALO as the member of the ICANN Board Member Selection Process Committee (BMSPC) 2017 Selection. Recently, I was the Regional chair for Social media working group from January 2020 to February 2022.

From then I have been part of all the virtual ICANN program. The last ICANN meeting I participated in was the ICANN61 as a coach in San Juan, Puerto Rico. Similarly, I attended the ICANN 60 as an ALS representative for the APRALO General Assembly with community travel program to Abu Dhabi, UAE and it was a great experience. During my visit, I felt I could use my communication and social media skills in understanding and addressing the overall engagement issues of new fellows.

My project Learn internet Governance has been working towards raising awareness about various internet governance process and integration among the unreachable communities.

ICANN Newcomer Toolkit after ICANN61

I am very active in the Asia Pacific region with various youth movement and internet governance process. My other engagements are, I am the MSG of the APriGF and have been contributing regularly to the Asia Pacific school of Internet Governance. I have been involved with the NRI group and was involved with developing the NRI toolkit for emerging IGF.

I am one of the signatories of Nepal IGF and Nepal SIG. In the past I was the member of the Internet Rights and Principles Dynamic Coalition from 2016-2018. With my engagement in the Asia Pacific community certainly helps me to understand the current issues and able to use my network to recruit more applicant to be ALSs in APRALO from that region.

The main reason for me to stand up for the election of VICE CHAIR APRALO is because I think we need to bridge the gaps and bring in more diversity and young leaders to contribute to Names and Numbers policy development. We need to drive the team from every possible way to make our community wide spread among perspective leaders and organizations.
