Regional Internet Registries & Number Resource Organization (NRO)	MOU	http://www.icann.org/en/aso/aso-mou-29oct04.htm http://www.icann.org/en/aso/aso-mou-attachmentA-29oct04.htm	Sets forth the role, responsibilities and functions of the Address Supporting Organization (ASO), including global policy development, which could include SSR-related issues.
Root Server Management • U.S. Government	Cooperative Research and Development Agreement	http://www.icann.org/en/committees/dns-root/crada.htm	CRADA assigning ICANN responsibility
Root Name Servers • F Root	Mutual Responsibilities Agreement	http://www.icann.org/en/froot/ICANN-ISC-MRA-26dec07.pdf	Details responsibilities for operation of the DNS root name server designated as 'F.root-servers.net'
IANA Functions • IETF Administrative Support Activity (IASA) • IASA • IASA • U.S. Commerce Department	• Agreement • Agreement • Agreement • Contract	http://www.icann.org/en/general/ietf-icann-mou-01mar00.htm (also see http://www.ietf.org/rfc/rfc2860.txt) http://www.icann.org/en/general/ietf-iana-agreement-v8.htm (new SLA being signed this week & will be added) http://www.icann.org/general/iana-contract-14aug06.pdf	Agreements detail the commitments, services, and tasks ICANN/IANA and the IETF (IASA) will undertake, including ICANN/IANA's protocol-assignment responsibilities (e.g. assignment and recording of protocol parameter values under standards established by the IETF). Some MOU terms are also set forth in RFCs (e.g. RFC 2860)
InterNIC - U.S. Commerce Department	License Agreement	http://www.icann.org/en/general/internic-license-08jan01.htm http://www.icann.org/en/general/internic-license-amendment-29sep09.htm	Provides ICANN with the right to maintain/use InterNIC
DNSSEC – • U.S. Commerce Department	Contract Modification	http://www.ntia.doc.gov/ntiahome/domainname/iana/Modification5_ICANN_DNSSEC_Implementation.pdf	Includes responsibilities for the management of the root zone Key Signing Key.
.ARPA	RFCs	http://www.iana.org/domains/arpa/ (and see http://tools.ietf.org/html//rfc5855#section-4 and http://tools.ietf.org/html//rfc3172)	RFCs provide management guidelines and operational requirements of the .arpa domain
.INT	RFC	http://www.iana.org/domains/int/	RFC addresses .int
International Organizations • United Nations Educational, Scientific and Cultural Organization (UNESCO) • United Nations Educational, Scientific and	List of MOUs Letter of Intent Cooperation Agreement	http://www.icann.org/en/global-partnerships/mous/ http://www.icann.org/en/global-partnerships/mous/icann-unesco-letter-of-intent-16sep10-en.pdf http://www.icann.org/en/global-	Memorandums of Understanding are mutual recognition agreements that identify possible areas of collaboration To provide member states by creating an IDN Cyrillic country names/abbreviations reference table (non-binding) – UNESCO proposed to start with Cyrillic with possible expansion to other IDN scripts - non-exclusive agreement so ICANN can work with others as well To support introduction of IDNs;

Cultural Organization (UNESCO)		partnerships/mous/unesco-mou-10dec09-en.pdf	to collaborate to explore the potential to assist developing countries in enhancing capabilities to actively participate in building an inclusive multilingual Internet
• Russian Association of Networks and Services (RANS)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/rans-mou-25jun08.pdf	Explore opportunities to build non-exclusive program to train, educate and refresh specialists and to promote best practices in field of designing and implementing information and telecommunication technologies, in the field of telecommunications policy, information and network security in Russia, and bring awareness about the process of Internet governance in Russia.
• Lomonosov Moscow State University Institute for Information Security Issues (IISI)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/iisi-mou-07apr08.pdf	The purpose of the MOU is to promote cooperation in the area of education and information exchange between MSU IISI and ICANN in relation to Internet governance, IP addresses and the DNS
• Inter-American Telecommunications Commission of the Organization of American States (CITEL)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/citel-mou-01sep08.pdf	Exchange information in areas of mutual interest including Domain names (forming a system referred to as DNS); Internet Protocol (IP) addresses and autonomous system (AS) number; and Protocol port and parameter number; discussions related to stability, reliability, security, and global interoperability of the Internet; discussions reflecting the functional, geographic, and cultural diversity of the Internet.
• African Telecommunications Union (ATU)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/atu-mou-13nov07.pdf	To exchange information and documentation relating to Internet governance issues; organize workshops and seminars to disseminate information and increase understanding of African policy makers and regulators on issues related to Internet governance; exchange experience, relevant information and material to foster evolution of appropriate policies and regulations to

			encourage the development and growth of the Internet in the African region.
• United Nations Economic and Social Commission for Western Asia (UN-ESCWA)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/un-escwa-mou-18jun07.pdf	Facilitate discussions and raise awareness in the Arab Internet Community in relation to technical and policy aspects of the Internet Domain Name System (DNS); explore opportunities to build cooperative relationship to endorse work toward implementation of non-ascii top level labels such as those based on Arabic script and to further enhance process to designate new generic top level domains
• Commonwealth Telecommunications Organization (CTO)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/un-escwa-mou-18jun07.pdf	Facilitate and promote participation in areas relating to Internet governance, Internet development in general and in the use thereof for developmental purposes and in particular the Internet's unique identifier system. (Including discussions contributing to the global stable operation of a single Internet.
• Pacific Islands Telecommunications Association (PITA)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/pita-mou-26apr07.pdf	Facilitate information exchange on Internet related issues; promote regional telecommunications and information technology standards, to mutually cooperate in capacity building and transfer of skills, knowledge and competency to the Pacific Islands region. In particular fostering a network of national and regional stakeholders and decision makers that could contribute to the development of telecommunications and information technologies in the region, including as they relate to the security, stability and interoperability of the unique identifier system.
International Organizations	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/	Memorandums of Understanding are mutual recognition agreements that identify possible areas of collaboration
• United Nations Educational, Scientific and Cultural	Letter of Intent	http://www.icann.org/en/global-partnerships/mous/icann-unesco-letter-of-intent-16sep10-en.pdf	To provide member states by creating an IDN Cyrillic country names/abbreviations reference table (non-binding) – UNESCO

			proposed to start with Cyrillic with possible expansion to other IDN scripts - non-exclusive agreement so ICANN can work with others as well
• United Nations Educational, Scientific and Cultural Organization (UNESCO)	Cooperation Agreement	http://www.icann.org/en/global-partnerships/mous/unesco-mou-10dec09-en.pdf	To support introduction of IDNs; to collaborate to explore the potential to assist developing countries in enhancing capabilities to actively participate in building an inclusive multilingual Internet
• Russian Association of Networks and Services (RANS)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/rans-mou-25jun08.pdf	Explore opportunities to build non-exclusive program to train, educate and refresh specialists and to promote best practices in field of designing and implementing information and telecommunication technologies, in the field of telecommunications policy, information and network security in Russia, and bring awareness about the process of Internet governance in Russia.
• Lomonosov Moscow State University Institute for Information Security Issues (IISI)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/iisi-mou-07apr08.pdf	The purpose of the MOU is to promote cooperation in the area of education and information exchange between MSU IISI and ICANN in relation to lnternet governance, IP addresses and the Domain Name System (DNS)
• Inter-American Telecommunications Commission of the Organization of American States (CITEL)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/citel-mou-01sep08.pdf	Exchange information in areas of mutual interest including Domain names (forming a system referred to as DNS); Internet Protocol (IP) addresses and autonomous system (AS) number; and Protocol port and parameter number; discussions related to stability, reliability, security, and global interoperability of the Internet; discussions reflecting the functional, geographic, and cultural diversity of the Internet.
• African Telecommunications Union (ATU)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/atu-mou-13nov07.pdf	To exchange information and documentation relating to Internet governance issues; organize workshops and seminars to disseminate information and increase

			understanding of African policy makers and regulators on issues related to Internet governance; exchange experience, relevant information and material to foster evolution of appropriate policies and regulations to encourage the development and growth of the Internet in the African region.
• United Nations Economic and Social Commission for Western Asia (UN-ESCWA)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/un-escwa-mou-18jun07.pdf	Facilitate discussions and raise awareness in the Arab Internet Community in relation to technical and policy aspects of the Internet Domain Name System (DNS); explore opportunities to build cooperative relationship to endorse work toward implementation of non-ascii top level labels such as those based on Arabic script and to further enhance process to designate new generic top level domains
• Commonwealth Telecommunications Organization (CTO)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/un-escwa-mou-18jun07.pdf	Facilitate and promote participation in areas relating to Internet governance, Internet development in general and in the use thereof for developmental purposes and in particular the Internet's unique identifier system. (Including discussions contributing to the global stable operation of a single Internet.)
• Pacific Islands Telecommunications Association (PITA)	Memorandum of Understanding	http://www.icann.org/en/global-partnerships/mous/pita-mou-26apr07.pdf	Facilitate information exchange on Internet related issues; promote regional telecommunications and information technology standards, to mutually cooperate in capacity building and transfer of skills, knowledge and competency to the Pacific Islands region. In particular fostering a network of national and regional stakeholders and decision makers that could contribute to the development of telecommunications and information technologies in the region, including as they relate to the security, stability and interoperability of the unique identifier system.
Affirmation of Commitments - U.S. Commerce	Agreement	http://www.icann.org/en/documents/affirmation-of-commitments-30sep09-	Sets forth commitments of ICANN and US DOC for SSR,

Department		en.pdf	transparency and accountability, etc.
