Transposition Table Working documents VM Subgroup -> draft policy

Heading	Brief description	Section VM document	Section draft policy
Definition Variants	Compliance with Root Zone Label Generation Rules	Main document section 2 (IDN Variant recommendations) item 1 9	Section 3.2.1
TLD strings/labels to be processed using RZ-LGR	Compliance with Root Zone Label Generation Rules	Main Document Section 3 (Technical Utilization of RZ-LGR) item 1	Section 3.2.1
Allocation of TLD to same entity	The set of allocatable variant strings that is generated from the selected IDNccTLD string by applying the RZ-LGR, must be allocated to one and the same entity	Main document section 2 item 2	Section 3.3.1
Allocation of SLD to the same entity	A Second Level string registered under a delegated variant IDNccTLD strings MUST be registered for the same entity under all other variant IDNccTLD strings	Main document Section 2 item 3	Section 9, A4
Registration SLD variant labels under variant TLDs to the same entity	All variants of a Second-Level string registered under all delegated variant IDNccTLD strings MUST be registered to the same entity under all IDNccTLD variant strings.	Main document Section 2 item 4	Section 9, A5
Registration of SLD variant labels under IDNccTLD to the same entity	All variants of a Second-Level string to be registered under a delegated IDNccTLD string MUST be registered to the same entity	Main document Section 2 item 4A	Section 9, A5 A
Harmonization of SLD IDN Tables		Main document Item 5, IDN Tables, deferred to Section 4 and separate document	NA
Back-end registry service	All delegated variant IDNccTLD strings MUST be operated by the same entity	Main Document Section 2 item 7	Section 9 A3

providers for variant TLDs			
Update of basic policies	Discussed in section 5 main. document VM subgroup		
All existing policies apply to IDN variants	All ccTLD related policies MUST apply to variant IDNccTLDs as well	Main VM Document Section 2 Item 9	Section 9 A2
Script integration requirement	For the scripts and writing systems which have been integrated into the RZ-LGR, the RZ-LGR must be the only source for processing	Main Document Section 3 (Technical Utilization of RZ-LGR) item 2	Section 4.1.1 Technical Criteria
Need to address any existing possible deviations from the calculation of the RZ-LGR	GNSO and ccNSO should work collaboratively and consider their respective policy, procedure and/or contract changes to address any existing possible deviations from the calculation of the RZ-LGR: • Delegated TLDs. • Self-identified "variant" TLDs.	Main Document Section 3 (Technical Utilization of RZ-LGR) item 3	Section 3.2.2, transitional arrangement
RZ-LGR Validation	Impact Validation	Main Document Section 3 (Technical Utilization of RZ-LGR) item 4	Section 4.2.2
Should RZ-LGR for script be required?	The script/writing system in which the Designated Language in which the selected IDNccTLD string is expressed MUST be integrated in the Label Generation Rules for the Root Zone.	Main Document Section 3 (Technical Utilization of RZ-LGR) item 5	Section 4.2.3
Limiting number of delegated variants	The number of variants may be very large, conservative approach re delegation	Main Document Section 3 (Technical Utilization of RZ-LGR) item 5	Section 3.2.3
Need to grandfather	Impact of changes	Main Document Section 3 (Technical	Section 3.2.4

existing TLDs after revision of RZ-LGR		Utilization of RZ-LGR) item 6	
IDN Tables: use cases and requirements		Specific Document on IDN Tables	Section 5.2.2 A
	"same entity" rule for a given label beneath two variant TLDs	Main Document Section 5 item 2	Section
	Update policies and procedures to set a functional definition for "same entity"	Main Document Section 5 item 3	NA
	Update Final Implementation Plan (FIP) of the Fast Track Process	Main Document Section 5 item 4	NA
	Update domain transfer and update process to reflect inter-TLD linkages due to variants and the need to enforce the "same entity" rule	Main Document Section 5 item 5	NA
	Update policies and procedures to allow the lists of reserved names and the strings for inappropriate delegation to reflect any variants	Main Document Section 5 item 6	NA
	Update ccTLD redelegation policy to reflect "same entity" constraint on variant TLDs	Main Document Section 5 item 7	Section 9 A3
	Update policies and procedures to incorporate variant label states and transitions between them	Main Document Section 5 item 8	Annex A
