18:12:00 From Russ Mundy to Everyone:

+1 to dropping non-expectations from the doc

18:28:02 From Paul Hoffman - ICANN Org to Everyone:

Each RSO is expected to serve root zone data as distributed by the RZM. An RSO is allowed to check the validity of a distribution from the RZM before publishing it, and may choose to not distribute if their validity check fails.

18:28:21 From Paul Hoffman - ICANN Org to Everyone:

(That's proposed wording for E.3.2-D)

18:35:53 From Paul Hoffman - ICANN Org to Everyone:

Yes, let's use Ken's as the target text.

18:41:20 From Ken Renard to Everyone:
