Re: **Application for position of volunteer to the WHOIS Review Team**

Please consider my application to this position.

I am interesting in working in this group not only because I can apply my team working skills to the group and analytical skills to the subject but because I understand that the final outcome (if any) will have an effect on anybody that uses the Internet.

Also, I am very eager to continue increasing my experience/knowledge in ICANN bottom-up consensus driven policy processes and ICANN policy review in general. This will allow me and the people that I represent to be more effective in the type and quality of feedback that our At-Large Organization can provide to ICANN as a whole.

I am including my CV and SOI as part of this application.
