Questions for designing SOPC Comments

Version 1. July, 22 2022

Basic approach

a. Focus on strategic level, not going too much into details
b. Look at ccTLD relevant areas and hone in on healthy ICANN
   Efforts: 30/70 % (entire plan vs ccTLD relevant topics)
c. Look at the differences compared with previous year(s)
d. Before commenting seek clarification if needed
e. Incorporate input from other groups/committees (if relevant/needed)
f. Review for quality/consistency before submitting

Questions per planning docs

General overview

1. Is the document format consistent with the previous one? Are there any significant differences?
2. Is the content of the document consistent with the previous one? Are there any significant differences?
3. Are the differences (if any) well explained?
4. What is not clear? What should be clarified?
5. Do we see major issues that might lead to Rejection Action?
6. Are we comfortable with major projects/major expenses in the Plans?
7. Percentage Budget expenditure difference per year – are we OK?

ccTLD relevant areas

8. Are we satisfied with what is planned in the ccTLD relevant areas (look deeply into details)?
9. Are specific needs of ccTLD community reflected in Plans (i.e. PDP implementation, level of support for ccNSO community, etc)
10. Any other issues/comments?
