Fragmentation

NARALO Readouts – ICANN75 Plenary

GTPF

Presented by: Pari Esfandiari

Nov 17, 2022

Purpose

" To contribute to the emergence of a shared understanding of Internet fragmentation and aimed to provide a space for an inclusive dialogue and reflection on the challenges it presents to the ICANN community. "

Key Challenges

GTPF

Security
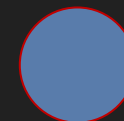

Trade

Privacy

Antitrust

Intellectual Property

Content

National Security

Sovereignty

Fragmentation

Definition

GTPF

> "
>
> Trends towards non-universal Internet experiences where the globally connected internet is fragmented based on the locations of users in sovereign territories.
>
> "

Trends

GTPF

Incompatible technical standards

Changes in the routing architecture

Multiple & incompatible
root zone files & associated
naming and numbering systems

Potential Scenarios

Bifurcation

Federation

Decenterlization

Impact on the End Users

Access to information	Multi-stakeholder model	Control
Industry competitiveness	Stability & predictability	Collisions between public & private names

Thank You
