The Budgets

Additional Budget Requests

Assessment:

- Requests which, on their face, are directly and demonstrably related to current ICANN policy development, advisory and technical work
- Addressing capacity building objectives through collaboration with ICANN's Public Responsibility Support and Global Stakeholder Engagement teams including development of materials that can be used for online (rather than face to face training)
- Considering the availability of resources (financial and staff) to support the individual and collective requests submitted in an equitable and transparent manner
- For travel requests – primarily – events taking place at an ICANN public meeting of other ICANN organized meeting

FY24 BUDGET

4 Million US\$ expenses in a 20 Million US\$ Fund?

Barely 1% Interest gain only?

3.2 Average FTEs

The following chart shows the average number of FTEs working under each segment of Total ICANN. FTEs consist of direct staff and staff allocations from ICANN Operations. New gTLD Program 2012 Round FTEs reflect efforts to process the remaining applications received in 2012. New gTLD Subsequent Procedures FTEs reflect the resources needed for policy development and implementation. The Grant Program, which is funded by Auction Proceeds, began in FY23 and will ramp up in FY24. In addition, prioritized Review Implementation, funded by the SFICR, will begin later in FY23 and continue into FY24.

~ 10% growth in FTE from the actual FTE numbers with 2% decrease in Incomes?

4.1 FY24 Budget versus FY23 Forecast

In Millions, USD	FY24 Budget	FY23 Forecast	Under/(Over) vs. FY23 Forecast

Initial Comments

Operating Initiatives and Budget

- Determination of ICANN activities to support initiatives
- Mechanisms for determination of outcomes
- For initiatives identified by ALAC – processes for evaluation?

MBM: Comments from Budget Response by Marita Moll

- There is still no fulsome **way to follow progress on the full set of multistakeholder model (MSM) issues** identified in community discussions. In addition, there is no overall strategy to recognize efforts—especially community-led efforts towards those initiatives. We reiterate our suggestion made last year, that there be a **regular, inclusive (all issues) progress report to stakeholders**, including a call-out to communities for contributions.
- The ALAC reiterates our previous comments that tracking and progress evaluation has to **include qualitative** as well as quantitative measures.
- The ALAC recognizes the need to collect this data, but the real emphasis should be on **education and support mechanisms to** make better use of the diversity we already have in our ranks. At-Large, given its RALO-based structure, is already a very diverse community. The challenge is to make sure there **are accessible entry points** for all who wish to participate.

Comments on 2023 Budget - MBM

Evolve and Strengthen the ICANN Community's Decision-making Processes to Ensure Efficient and Effective Policymaking

- The ALAC would like to know how and when the **evaluation of progress** will take place, regarding the work identified to date in Evolving the ICANN Multistakeholder Model. We would also like to **see regular reporting** showing progress or lack of progress in the issues identified.

Is the position **of project manager** mentioned in FY22 now redundant, or has this been incorporated into an existing staff role?

- The ALAC would also like to have a **staff member specifically assigned as policy support for the At-Large community.**

MBM: Comments from Budget Response

- ICANN Learn remains an excellent resource but there is a gap between the curious observer and those who are already engaged enough to go through the registration process and have the discipline to follow through with the courses on an individual basis. Increasing **support for tools such as Internet Governance Schools**—both in-person and virtual—and the volunteers who organize them would help bridge this gap in outreach.
