President, 2007 June onwards Internet Society India Chennai, one of the 100 Isoc chapters

Chapter President, 1984, Junior Chamber International Theni, India

Secretary, 1982 - 1983, Rotaract Club of St Joseph's College, Trichy, India

Voluntary Pursuits

He has been taking part in ISOC programs and ICANN meetings as a person who immensely values the Internet Model. He believes in a well balanced system of Governance in its minimal form, he has been actively participating in the key discussions on Internet Governance in various forums including the Internet Governance Caucus.

His interest in the growth and evolution of the Internet stems from an innate desire to contribute very significantly to the world at large on a macro level. In 1991 he was one of the four delegates from India to the one of its kind International Model United Nations organized by the Junior Chambers International and held at the UN General Assembly Hall in New York where he introduced a spiritedly debated draft resolution to strengthen the United Nations. One of his early works was on Strengthening Democracy Another of his early papers on the Internet Architecture issues sent as a mail to W3C proposed "Costume Party Model" for "Reconciling Society's Concerns for Privacy with the imperative of Authentication" - an idea that he now considers imperfect.

He contributes to CircleID on topics related to Internet Governance. Some of his blogs are <http://isocmadras.blogspot.com> and <http://wealthyworld.blogspot.com> He has published articles at a Citizen Journalism portal in India.

He has a comprehensive understanding of Internet and how it is shaping up; the general issues and challenges pertaining to the swift transition of the business and the world's population to the Internet era. He believes that there can be a solution acceptable to all stakeholders who have conflicting interests. He is working on concepts that would further the Internet Model as the world moves towards the next billions of Internet Users and a richer Internet.
