DNS4EU: *EU Digital Policy*

EU to Boost European
Digital Sovereignty, Infrastructure & Security.

Motivations:
- Increasing reliance of critical services on digital technology
- Central role of digital technology in geopolitics
- Decline in European digital enterprises
- Dependency for services on foreign-owned and controlled enterprises
- Increased geopolitical tensions and cyber-hostility.

Concerned with the level of national infrastructure resilience, interdependence, & vulnerabilities.

DNS4EU: *EU Digital Policy*

Justification

- DNS resolution service is a key element,

- DNS is a critical service infrastructure,

- Private market is essential,

The Project

To exert control over the DNS, DNS4EU was outlined by the European Commission in December 2021.

It will offer an alternative, European service for accessing the global Internet.

DNS4EU: *The Project*

Project Design

- Premium service
- Threat intelligence sharing platform
- On-premise resolver
- Publicly accessible cloud resolver

EC Requirements

Data processed in Europe in full compliance with EU rules.	Personal data is not monetized.
