

## Statement of interest (EURALO Elections 2023)

Natalia Filina. April 2023

I thank Sebastien Bachollet for nominating me and very appreciate my colleagues for the support. The role of RALO's Secretary is both a great honor and responsibility at the same time.

My plan is to be a good assistant to the EURALO Chair in the work processes, to be a link (where necessary or possible) with At-Large structures and Individual members on the ground.

I will continue to work in the Outreach and Engagement and communication development, because we should be representative and find the most effective way to explain why organizations and individuals should join us and show all ways to join.

I want to make my possible contribution to the development of not only our RALO, but also At-Large as a whole.

I'll do my best to set up my daily working and personal agenda with ability to be an active participant and initiator of useful EURALO and At-large events, with enough time to increase my knowledge/understanding of the internal ICANN work, the possibility of cross-constitutional interaction for the benefit of strengthening Multistakeholder Model with the participation of all interested parties, but first of all - end users of the Internet. I clearly understand our (EURALO, At-Large) role and our importance on this way.

I would like to take this opportunity to thank members, leaders of Euralo and At-Large, the Chair of Euralo Sebastien Bachollet, and the ICANN staff, GSE team for their trust, incredible hard work, support, and help, for the mentoring. With all of you I realize that nothing can be impossible!

That is the great - to learn from you every day and enjoying our communications.

Sincerely yours,

Natalia Filina
