

00:14:58 Julia Charvolen – ICANN Org: Welcome Tatiana, the call has just started

00:15:10 Tatiana Tropina: Reacted to "Welcome Tatiana, the..." with 😊

00:18:37 Tatiana Tropina: 60 min sounds great.

00:18:41 Peter Koch: support for 60 mins

00:19:39 David McAuley (Verisign): Fair point, Bart

00:23:18 David McAuley (Verisign): This looks OK to me

00:23:31 Sabrina Wilkinson (CIRA): looks good to me too!

00:23:41 Tatiana Tropina: Looks okay

00:25:27 David McAuley (Verisign): +1 @ Bart

00:32:27 Tatiana Tropina: This is very true, David – but also by acknowledging we have to bring to the debate the idea of robustness of internet infrastructure and different functions (as opposed to content). I was at the RightsCon in Costa Rica, and the debate and general narrative struck me as horrid. Basically, it was "Internet is bad, bad, bad, bad, bad, bad".

00:33:18 Tatiana Tropina: It's hard to tread here without succumbing this narrative and contributing to it, perpetuating it.

00:33:49 David McAuley (Verisign): + 1 Sabrina – our staff does excellent work in prep of sessions – practice runs also very important

00:34:34 David McAuley (Verisign): good points Tatiana – I was listening to a lot of RightsCon and agree

00:34:35 Heidy Isabel Hernandez .gt: I was very grateful for the cyber security session, it helped me understand how far behind this regulations are in my country and in which direction to move forward

00:36:31 Tatiana Tropina: Peter I said I am against inviting them 😞

00:36:43 Tatiana Tropina: (The Commission).

00:37:05 Tatiana Tropina: The most horrid for infrastructure might be the CSAM proposal.

00:40:11 Tatiana Tropina: Another thing is that people who are at GAC are not always the people who draft those regulations.

00:40:43 Tatiana Tropina: With some exceptions like the UK and some others or god forbids the EU Commission 😊

00:42:15 Tatiana Tropina: I wonder if anyone would answer the second question on the slide with a "no, they are not in conflict" 😊

00:42:23 Tatiana Tropina: Except the Commission of course

01:05:41 David McAuley (Verisign): Interesting, thanks Bart

01:07:10 David McAuley (Verisign): not surprised to see capacity building at the bottom

01:08:23 David McAuley (Verisign): Bart – for the 12th can you point to menti code in the agenda or at the outset of the mtg

01:09:37 Sabrina Wilkinson (CIRA): I'd certainly be

interested in that! Thanks for flagging Annaliese
01:09:54 David McAuley (Verisign): a great idea - to
meet with Lise Fuhr re WSIS +20
01:10:16 bart.boswinkel: @ DAvid
01:10:17 Anil Kumar Jain CEO NIXI India: great idea
01:10:48 bart.boswinkel: I will next time, wanted to use zoom
poll
01:11:32 bart.boswinkel: But failed
01:13:35 David McAuley (Verisign): Veni Markowski of
ICANN Org is also paying a lot of attention to WSIS +20 - might also
be a good source to touch base with
01:14:36 David McAuley (Verisign): Thank you
01:14:40 Sabrina Wilkinson (CIRA): Thanks for a great
meeting
01:14:43 David McAuley (Verisign): :-)
01:14:47 Tatiana Tropina: Thank you all for a great
meeting!
01:14:55 Yonglin Yao (.cn): 👍
