Review ICANN77 Legislative session
Thursday, 15 June 2023 | 14:45 - 16:15 UTC (10:45-12:15 local)

IGLC session on legislative initiatives relating to cybersecurity and how they affect ccTLDs.

ccTLDs from different ICANN geographical regions explored how various national or regional legislative initiatives relating to cybersecurity impact them.

Presenters also addressed the challenges these initiatives pose for the global Internet and the multistakeholder model, as well as potential points of interaction between the various legal frameworks.

Annaliese Williams (.au) | Session Chair
- Sabrina Wilkinson (.ca)
- Norman Warputt (.vu)
- Lourino Chemane (.mz)
- Rosalia Morales (.cr)
- Barbara Povse (.si)

What went well?
What can be improved?

From the Q&A at the end of the session:
1. What are the drivers for legislators? What problem are they trying to solve?
2. Are the attempts by EC in conflict with their stated support of the multistakeholder model?

Reminder IGLC objective (see charter)

- The IGLC has been established to coordinate, facilitate, and increase the participation of ccTLD managers in discussions and processes pertaining to Internet Governance.

- The ccNSO Council and individual ccTLD Managers, collectively or individually, will be invited to support the position or input of the IGLC. The Committee will take a proactive role in seeking and fostering participation and input into the processes and provide regular feedback to the ccNSO Council, ccNSO members and broader ccTLD community.
