## Board Decision on Outputs

## Project Description

The SubPro IRT assists ICANN org in the implementation of the policy outputs in the Final Report in the new gTLD Subsequent Procedures Policy Development Process.

The outcome of this process will be an updated Applicant Guidebook.

The SubPro IRT has the form of an 'Open + Representative Model' based on the GNSO's PDP 3.0 model.

The SubPro IRT is part of WorkStream 1 of the Next Round of the New gTLDs Program.

The weighted % of completion represents an estimation of the work that has been completed weighted against the estimated level of effort for each topic. Given the many factors involved, this percentage should only be seen as an approximation and not an accurate depiction.
