

NCAP DG Path Forward to Completion

The NCAP chairs would like to propose the following next steps be conducted in order:

1. Review and discuss remaining draft recommendations
 - a. Eight to ten remaining recommendations largely not focused on technical details of workflow
2. Focused NCAP DG calls on contention areas to discuss options, compromise, etc:
 - a. Workflow technical details - ACA, PCA
 - b. Data privacy concerns
 - c. Contention set timing
 - d. TRT guidance
3. Technical writers revise Findings and Recommendations (done in parallel with #2).
4. NCAP DG to review, revise, and reach consensus on all Findings
 - a. Once consensus is called, technical writers to update answers to Board Questions appropriately with references/citations
5. NCAP DG to review, revise, and reach consensus (TBD) on all Recommendations
 - a. Update Board Questions appropriately with references/citations
6. Discuss the necessity of NCAP Study 3
 - a. If NCAP DG feels it is not warranted, worthwhile, etc. then a brief one or two page document should be written documenting it and it be placed within the Study 2 final report
7. Publication of Study 2 final report
