18 August 2022
RSSAC Caucus RSSAC002v5 Work Party Teleconference Chat Transcript

17:02:27 From Ken Renard to Everyone:
    #include <pizza.h>
17:14:09 From Ozan Sahin - ICANN Org to Everyone:
    Link to SoW: https://drive.google.com/file/d/1vcjposiaD6RvrXhoxHv-670rfhZvKXQI/view
17:26:49 From Ray Bellis to Everyone:
    my other response would be that take up of QNAME minimisation can be perfectly adequately measured using the yearly DITL survey.
17:28:53 From Duane Wessels, Verisign to Everyone:
    002 already talks about optional metrics
17:29:31 From Ray Bellis to Everyone:
    Aren't *all* RSSAC002 metrics optional? No RSO is formally obligated to implement this.
17:29:52 From Ray Bellis to Everyone:
    notwithstanding we've all nominally agreed to.
17:31:15 From Duane Wessels, Verisign to Everyone:
    7 Identifier-specific Metrics
    In some cases, RSOs may wish to publish statistics beyond what this document prescribes. In order to avoid collision and ambiguity in names, identifier-specific metrics should be prefixed with the identifier's letter ([a-m]-root).
    RSOs who wish to publish statistics from prior versions of this specification, but that are no longer required, may continue to do so using the historic metric name.
    Examples:
    version: rssac002v4
    service: d.root-servers.net
    start-period: 2016-01-01T00:00:00Z
    metric: d-root-XYZ-metric
    sample-xyz-metric-1: 23498
    sample-xyz-metric-2: 25678
17:35:27 From Ray Bellis to Everyone:
    gah, I've been raising the wrong reaction hand…
17:39:06 From Ken Renard to Everyone:
    what about the term "experimental metrics"
17:39:45 From Paul Hoffman - ICANN Org to Everyone:
    I don't think the measurements are experimental
17:41:16 From Paul Hoffman - ICANN Org to Everyone:
    Prefer one hour later (US west coast)
17:41:39 From Ray Bellis to Everyone:
    one hour later clashes with ISC's management team meeting
17:42:03 From Ray Bellis to Everyone:
    (our weekly scheduled one, at 11:30 eastern time)
17:42:34 From Karl Reuss to Everyone:
    1 hour later is also bad for UMDs scheduling

17:42:38 From Ozan Sahin - ICANN Org to Everyone:
    Wiki space: https://community.icann.org/x/IYGLD
17:43:14 From Paul Hoffman - ICANN Org to Everyone:
    Next week is fine
17:44:02 From Peter DeVries to Everyone:
    no preference here
17:44:57 From Brad Verd to Everyone:
    Is there a "rush" on this or can it wait until after holidays
17:46:15 From Ray Bellis to Everyone:
    thumbs up here or thumbs down to get a quick survey
