

Statement of Interest to volunteer in the At-Large New gTLD WG

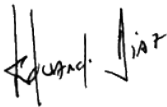

Eduardo Diaz
ISOC-Puerto Rico
NARALO/ALAC Member

I am an Electrical Engineer with more than 30 years of experience in Telecommunications and Information Systems. Currently, I am the President of my own company - D Consulting Group, Inc. - which consist of only one employee (me). I provide consulting services mostly related to the area of Information Systems Engineering. Also, I design and develop web applications for several clients.

I do not have any financial ownership or senior management/leadership interest in registries, registrars or other firms that are interested parties in ICANN policy or any entity with which ICANN has a transaction, contract, or other arrangement.

I do not have any type of commercial or non-commercial interest in ICANN GNSO policy development processes and outcomes. Also, I do not have any arrangements/agreements between me and any other group, constituency or person(s) regarding your nomination/selection as a work team member.

I am interesting in working in the At-Large gTLD RG because I can apply my analytical skills to the subject, understand that the final outcome (if any) will have an effect on anybody that uses the Internet and also because I want to get more experience/knowledge in the ICANN bottom-up consensus driven policy environment.
