

EXPRESSION OF INTEREST
NOMCOM Representative for EURALO/ALAC

I am Anne Marie Joly Bachollet, the representative of an ALS named E-senior within EURALO and within Afric.

The aim of the E-senior association is to fight against e-exclusion by providing access to and training in information and communication technologies for seniors and or disabled people with the purpose of:

- Bridging and shrinking the digital gap between generations,
- Caring for elders by fighting against senior isolation and
- Opening new horizons for the efficient use of free time.

E-senior is also very involved in European projects to be the side of senior end users in those projects.

As Vice chair of Isoc France, I am in charge of seniors' inclusion and I participated to the French FGI and to some global IGF.

I am ready to serve EURALO and ALAC by participating in the Nominating Committee on behalf of European Internet users.

I was in the board of EURALO from 2019 to 2023.

I have participated in ICANN and EURALO meetings or conference calls in the last ten years.

I was delegated by EURALO in AASC (ALAC Subcommittee on Appointee Selection) from 2020 to 2023.

I am involved in the EURALO ALS Engagement Working Group, in CPWG.

I know people in the different stakeholder group of ICANN, like ccNSO, gNSO and a regular listener of the Board.

More specifically for this application position:

During my professional career in the human resources Department of a large international group, I had the opportunity to recruit executives.

Because the intercultural aspect of applicants was so important, I can pretty well recognize the skills needed to take diversity into account when recruiting people.

That is to say, the Anglo Saxon system is challenging for some other cultures, and the Nominating committee covers the whole world.

My experience and my skills would be very useful to the Nominating Committee to continue improving the process of selection of candidates in the different ICANN bodies.
