

Dear All,

Thank you again for your feedback on the At-Large travel policy. I want you to know that we have heard your concerns regarding the proposed At-Large travel policy and we want to keep discussing it with you. The need for an objective, utilitarian and flexible travel policy still exists to ensure that those actively engaged in ICANN work are in the best position to participate and we are actively planning for the future.

For ICANN80, we propose to revert to the allocation of 15 slots to the ALAC, 10 to the five RALOs and 3 for ALAC Liaisons and one for the ALAC Chair. Given that 3 ALAC members are unable to travel to Kigali, we would like to offer them to AFRALO to allocate as they wish. These 3 slots are unused ALAC slots so they are not drawn from expected slots.

For ICANN81, as this is the Annual General Meeting, we will also use the allocation which also supports the travel for outgoing, incoming, and continuing ALAC and Regional Leaders, according to their regional rotations

For the longer-term development of an At-Large travel policy, starting as early as May 2024, we suggest engaging in regional listening sessions where everyone has the opportunity to share their views and explain any concerns in a structured manner. Should you agree, we've asked Melissa Allgood, a member of ICANN org specializing in conflict resolution, to lead these discussions as a neutral facilitator. Melissa will not act as a representative of ICANN org, but rather will structure our dialogue to ensure that all participants are heard and their views considered. We will work with RALO leaders to include these listening sessions at a time that best meets the needs of each region, perhaps during scheduled monthly calls.

The development of a formal At-Large travel policy will take some time and we would like for all voices to be heard and considered. Ideally, we would like to work jointly with you - - in eliminating subjective answers with agreed, objective metrics that meet well crafted expectations of volunteers in performing the role of the ALAC as tasked under the ICANN Bylaws. Such a policy should be reflective of the values of the bottom-up multi-stakeholder model.

Let us move forward in an inclusive, constructive, transparent, and respectful manner within our community.

Jonathan
