Outreach and Engagement Plan

Agenda Item #3

Outreach and Engagement Plan

In its [Final Report](#) on the New gTLD Subsequent Procedures Policy Development Process (Final Report), the GNSO underscores the importance of **creating early awareness with as many potential applicants around the world as possible and ensuring that potential applicants know about the program with sufficient time to prepare and apply.**

The plan recognizes that capacity development, communications, and engagement with a focus on global inclusivity are key to fostering diverse participation in the next round of new gTLD applications.

Outreach and Engagement Plan

The campaign encompasses five phases:

1. **Early Awareness** — A targeted awareness campaign (beginning March 2023) highlighting the importance of Universal Acceptance (UA) and Internationalized Domain Names (IDNs) in creating a more inclusive Internet.
2. **Community-level Awareness** — A grassroots campaign (May - October 2024) to generate interest in the next round within the ICANN community and among industry participants.
3. **Strategic Engagement** — (October 2024 through December 2025) ICANN org will create awareness about the importance of the DNS and interest in new gTLDs *outside of the ICANN community*.
4. **Application Readiness** — Focus on preparing applicants to submit their gTLD applications.
5. **Post-Assessment** — Evaluate whether the campaign achieved its objectives to allow for course correction in the future.

Outreach and Engagement Plan

The ICANN community is an important ally in identifying and engaging with the audiences envisioned in the Final Report.

Outreach and Engagement Goals

Overarching program goals (GNSO):

Foster diversity

Encourage competition

Enhance the utility of the DNS

In support of these goals, outreach and engagement seeks to:

1. Promote inclusive participation.
2. Facilitate engagement.
3. Highlight the value of gTLDs.
4. Collaborate.

Proposed Delivery and Approach

May 2024 — ICANN org will kick off a grassroots effort to begin generating a buzz about the next round and create awareness of the Applicant Support Program and Registry Services Provider Evaluation Program.

Leverage local, regional, and community relationships to build awareness among businesses and organizations that may have interest in becoming a registry operator.

In October 2024, ICANN org will launch a formal global campaign —18 months before the application submission period opens. This will continue through April 2026.

This phase includes broad engagement activities that include speaking events, webinars, as well as a targeted global public relations campaign.

Timeline for Key Events

**NEW gTLD PROGRAM:
NEXT ROUND**

TIMELINE FOR KEY EVENTS

Supported by Communications and Engagement

Audiences

1. **Registrars**, especially in developing/underserved regions, that may be interested in operating a gTLD.
2. **Civil Society**, nongovernmental organizations, advocacy groups, philanthropists, and others focused on promoting inclusivity, diversity, and cultural preservation online through new gTLDs.
3. **Businesses and entrepreneurs**, especially those operating in regions with limited access to digital infrastructure; those looking to differentiate their product or service; and those looking to compete in the global marketplace using gTLDs.
4. **Local governments**, that want to promote their local region or culture.
5. **Brands**, organisations that want to launch new products and services, enhance customer experience, innovate new technology and provide flexibility for future innovations.

Program Messaging

Tailored messaging to communicate the opportunities associated with the program with clarity and impact.

These messages will:

- Highlight the importance of new gTLDs in promoting digital inclusivity and their potential in preserving cultural diversity.
- Showcase how operating a .brand TLD can enhance and extend brand identity.
- Emphasize the control and security benefits of operating a .brand TLD, including brand defense and protection, and mitigation of cyber threats.
- Highlight the built-in safeguards to protect intellectual property rights in the DNS (e.g., the Uniform Domain Name Dispute Resolution Policy, Uniform Rapid Suspension, and Trademark Post-Delegation Dispute Resolution Procedure).
