Motivation for Membership in Caucus

Ensuring ongoing stability of the DNS root service by participating in discussions and work of mutual interest between the root zone operator community and the IANA functions operator.

Indication of Availability

Engaging with interested and affected stakeholders in the IANA functions, and the DNS root zone in particular, is a component of my role at ICANN and an overall commitment ICANN has undertaken to resource.

Formal roles and interests in the Work of RSSAC

- ICANN's Functional Liaison for Root Zone Management
- Direct involvement in DNS related aspects of the IANA functions
- Manage the Cryptographic Business Operations (Root KSK) team at ICANN
