READOUT – ICANN80 – KIGALI, Rwanda

Some comments about Nextgen participation and DNS Women session

NextGen group – ICANN80

Their presentation reflected their preoccupation with their local culture and economic strength but also they are aware of how the emergency technology would impact their countries.

• **AFRICAN COUNTRIES**	**EDUCATION STATUS**
• Benin, • Kenia, • Nigeria, • Congo • Gambia, • Chad • Rwanda	Computer Science, Engineer, Law, Business, Economics

from Maarten Botterman

- Brief greeting that can be accessed at DNSW Website

DNS Women

- **75 people attended**

NEXT Steps :

Before the ICANN81 in Istanbul, Vanda Sartezini is providing a new database with actualization of all women registered as DNS Women members.

They will receive sooner the survey which will give a better register about the DNS future to pass a survey in all regions with all dates listed there.

Note :

ICANN 81 will be in the Asia Pacific Region, we are accounting with the collaboration of our team: Amrita, India Cheryl, Australia, and Maureen, Cook Island, intending to follow with the same program, successful and relevant ladies in the challenges and rewards.

Vanda

The End
