

**Adobe Connect – Chat Transcript from IDN IDN Variant TLDs Program Update –
Amsterdam – 24 January 2013**

Nicoleta Munteanu: (1/24/2013 00:08) Hello everyone.

Cary: (00:09) The audio quality on the Net is really poor.

Nicoleta Munteanu: (00:09) I am your Remote Participation Manager for this session. Welcome!

Nicoleta Munteanu: (00:09) @Cary, could you try the phone bridge?

Donna Austin: (00:09) I can't hear anything

Cary: (00:09) just about to

Nicoleta Munteanu: (00:10) @Donna, are the speakers unmuted on the device you are using?

Nicoleta Munteanu: (00:11) Please note that this conference call is being recorded and that chat sessions are being archived, so follow the ICANN Expected Standards of Behavior:

<http://www.icann.org/en/accountability/frameworks-principles/community.htm#f>

Nicoleta Munteanu: (00:11) Cary, Donna...does the sound work?

Cary: (00:11) audio via the dial-in link is fine

Donna Austin: (00:12) I can't hear anything but will try to dial in

Nicoleta Munteanu: (00:14) @Donna, please try to click on Connect my audio in the Adobe room. It is under the phone button.

Nicoleta Munteanu: (00:17) Please note that Questions and Comments will be addressed and read on the mic within the time set by the Chair of the session.

Donna Austin: (00:17) connected, thanks Nicoleta

Nicoleta Munteanu: (00:17) excellent

Donna Austin: (00:38) it is difficult to hear questions from the floor. Could Francisco recap before answering.

Nicoleta Munteanu: (00:43) Are there any comments or questions from our remote participants?

Nicoleta Munteanu: (00:45) If you have any comments or questions that you would like to be expressed or asked in the room, please label your question or comment as "QUESTION" or "COMMENT".

Cary: (01:10) QUESTION: Language communities that use the same script may or may not be willing to collaborate in determining an IDN-safe tabulation of that script. This implies at least some risk of opposition to the LGR panels and tables assembled by them. What happens if this form of controversy besets the treatment of a script that is too important simply to be excluded from consideration?

Nicoleta Munteanu: (01:13) Thank you Cary. Question will be asked by the chair.

Donna Austin: (01:14) I seem to have lost audio on the phone

Steve Sheng: (01:14) me too.

Cary: (01:15) no audio from the meeting via either channel

Nicoleta Munteanu: (01:15) We apologize for this. The conference room is disconnected. Team is working to solve this issue.

Steve Sheng: (01:18) sorry i couldn't hear the question, could someone repeat the question to the microphone?

Cary: (01:24) The question was more about community acceptance of a panel, not a panel's internal discussion.

Donna Austin: (01:28) To what extent would the ccNSO, IDN ccTLDs, be asked to comply with any recommendations?

Nicoleta Munteanu: (01:32) this question has been transmitted to the chair.

Donna Austin: (01:37) Thanks

Nicoleta Munteanu: (01:38) Thank you for participating in this session.

Nicoleta Munteanu: (01:38) Audio recording and Chat questions and comments for this session will be available at: <https://community.icann.org/display/VIP/Meeting+Minutes>
