Olivier Crepin-Leblond:+1 - answer any number of questions

Avri Doria:I also submitted an extra question which I have reworded a bit: To what extent has ICANN Staff been bound by accountability standards? Can you give examples of where ICANN Staff has restricted its decisions making to the boundaries as set by the Development Processes? Can you give examples where ICANN Staff has gone beyond the ICANN Community policy development process to either make new policy or replace existing policy without Community development process of consultation? Are there specific accountability issues ATRT2 should explore related to ICANN Staff's interactions with the Community policy development process?

demi:quite ample quetionary. Also think it may be too heavy to be completely answered by interested parts.

demi:May be staff could work integrating larry's, Carlos's and Avri'squestions in a single document
