

GNSO Policy Development

Creation of Implementation Review Team option under PDP Manual, but limited guidance on how these should function or operate.

Governed by the ICANN Bylaws and GNSO Operating Procedures (PDP Manual) – Revised process adopted in December 2011

GNSO Policy & Implementation Working Group – tasked to develop a set of principles that would underpin any GNSO policy / implementation related discussions; recommendations on a process for providing GNSO “Policy Guidance”; a framework for implementation related discussions associated with GNSO Policy Recommendations; criteria when something is to be considered policy or implementation, and; further guidance on how GNSO Implementation Review Teams are expected to function and operate.

PDP Manual: WGs are ‘are encouraged to include proposed timing, assessment tools, and metrics for review as part of their Final Report. In addition, the GNSO Council may at any time initiate reviews of past policy recommendations’ - but limited guidance on what timing, assessment tools would be appropriate.
