Larisa Gurnick:At your request, staff assembled information regarding the Public Comment Process that had been discussed during the PPC meeting in Prague on 24 June 2012. Here is a link to the minutes of the meeting (<http://www.icann.org/en/groups/board/documents/minutes-ppc-24jun12-en.htm>) and attached are two documents presented and discussed at that meeting.2012-06-24-PPC-Public-Comment-Process-Discussion-Paper.pdf2012-06-24-PPC-PublicCommentProcessesFY[1].pdf

Avri Doria:tyhe agenda is the questions/

Jørgen abild andersen:Olivier, with respect to the format of information from staff I have still the same wishes for more digestable information. But being the only one with these wishes I have resigned.

Avri Doria:the meeting times range from 15mins to 90 minutes

Olivier Crepin-Leblond:Thanks for your comment Jorgen. could you please draft a 2-line proposal on how you'd like the information formatted?

Avri Doria:and also we materialize instantly from room to room.

Jørgen abild andersen:I will come back to you after this call

Alan Greenberg:@avri standard ICANN teleportation.

Olivier Crepin-Leblond:Thanks Jorgen

Avri Doria:why is thsi WS doing meeting planning?

Avri Doria:the aganda, hello, questions, other questions, thanks you.

Alan Greenberg:USing time waiting for Christina.

Alan Greenberg:Has staff tried to contact her and see if she is coming?

Carlos Raul:There we go

Avri Doria:i have come to think of her as Godot

Carlos Raul:that's exactly what I was wondering

Larisa Gurnick:Alan, I am tracking Christina right now.

Alan Greenberg:Thx

Olivier Crepin-Leblond:Thanks Larisa

Avri Doria:pending time on procedures is what we do best.

Jørgen abild andersen:could we have the text on the screen

Avri Doria:answers that contain "as much as feasible" are non answers

Fiona Asonga:Yes I hhave a question

Avri Doria:i do not understand "to the extent feasible" what are the constriants? what was done to expand feasibility?

Jørgen abild andersen:Many thanks for putting rec. 18 on the screen

Avri Doria:Are all of the documents reference in the answers avaiable in the ATRT document area?

Charla Shambley:Yes, they are available on the wiki

<https://community.icann.org/display/ATRT2/Information+provided+by+ICANN+Staff>

Avri Doria:a while back the answer was "we have done as much as is feasibility" I do not understand what that means.

Avri Doria:i do not understnad the big lag in documents since they are aviaalbe in draft for a very long time, and (for example at the UN) they can do differential tranaplation quite quickly.

Olivier Crepin-Leblond:tranaplation?

Jørgen abild andersen:I have to leave in a couple of minutes - will be back in WS4 in a couple of hours.
Bye

Olivier Crepin-Leblond:thanks for attending Jorgen

Avri Doria:very stable drafts

Avri Doria:do they track the work to kow when docs are to be expected. is this completely a push operaton?

Avri Doria:i worked at the un for 6 years and they do it quickly

Avri Doria:what does the UN staff know that we dont know.

Avri Doria:i am not a linguistic, but an expereinced user of such services.

Avri Doria:ok, so it is a capacity issues. something that more funding might alleviate.

Avri Doria:also it sounds like we need a way to input WG schedules earlier so tranalation can plan

Alan Greenberg:We are way over time.

Olivier Crepin-Leblond:yes I'll close the call shortly

Avri Doria:lack of cooprdination

Avri Doria:but if the WG process includes a clue: put transpation scheudle here - they might remember.

Avri Doria:we capture and save the 'everyone'chats. correct?

Avri Doria:thanks just checking.

David Conrad:thanks!

Charla Shambley:Thank you for participating in today's WS1 Call.
