Thank you very much Lise.

I'm sorry I could not connect to the whole Washington meeting. I don't know if you are going to deal with other financial issues in other templates. But beyond all inputs into this template, which I think is very good, I have a particular issue I don't see reflected here.

I think that some specific "functions" of ICANN need to be guaranteed at the highest professional level possible and their financial support should be clearly evident and separate from the rest in the budgeting and reporting side. I think that support for the policy development process, as well as the compliance functions deserve clear separation and justifications, so that the community is assured, that those functions are properly and continuously endowed, clearly staffed and its performance beyond any ups and downs of the overall financial situation and development of the DNS business volume.

Maybe this is going to show up in the other templates you announced.

Best regards

2013/9/27 Lise Fuhr <[lise.fuhr@difo.dk](mailto:lise.fuhr@difo.dk)>

Dear ATRT2,

Jørgen and I hereby send a revised version of the Finance template with the remarks from our meeting in Washington incorporated.

I have more templates to come during the weekend.

Enjoy your Friday

Best,

Lise
