	??? - others	registrars	registries	registrants	data consumers	notes
ongoing costs						compare to .COM transition from RRP to EPP
						this one - smaller, faster, simpler -- cheaper
after transition						similar to "starting to escrow" project - a bit of a startup cost
escrow costs		no change	no change?			followed by a small ongoing
port 43 costs		eliminated	incr. higher			
web-Whois costs		negligable	negligable			whois server costs are a small fraction of web-server costs
access costs				lower/small	lower/small	
??? Others						
transition costs						
develop transition system		less than next TLD	less than next TLD			
specification						
design			similar to transition			
build		similar to a "start	from RPP to EPP, but			
test		up escrow" project	much easier/cheaper			
convert/move data		costs scale w/#	costs scale w/#			
transition planning/training		no training	no training			
convert data		no conversion	no conversion			
send/receive data		costs scale w/#	costs scale w/#			
review/approve data		costs scale w/#	costs scale w/#
