

Global Key Internet Activities 2014

Montevideo Statement on the future of Internet cooperation
 7 October 2013
 The leaders of organizations responsible for coordination of the Internet technical infrastructure globally have met in Montevideo-Uruguay to consider current issues affecting the future of the Internet. The Internet and World Wide Web have brought major benefits in social and economic development worldwide. Both have been built and governed in the public interest through unique mechanisms for global multistakeholder Internet cooperation, which have been intrinsic to their success. The leaders discussed the clear need to continually strengthen and evolve these mechanisms, in truly substantial ways, to be able to address emerging issues faced by stakeholders in the Internet.
