# ICANN72 Plenary Topic Proposals

## 1 Unfinished Business: Closed Generics (ALAC)

What will happen with Closed Generics in subsequent rounds, where the 2012 Guidebook allowed for them, but the GAC advised against them, and there is currently no policy\* in place? This session will open this conversation, surrounding closed generics, up to the broader community.

## 2 Tackling DNS Abuse (ALAC)

This proposal aims to bridge the widening gap between policy development around activity considered abusive to the Domain Name System (DNS Abuse) and relevant legal and policy measures. With the overall goal of breaking the silos, it brings together technical community, governments and business from around the globe to offer different perspectives on DNS Abuse and platform liability.

## 3 Moving Forward with the Global Public Interest Framework (ALAC)

The ICANN FY22 Operating Plans include the following activity: "Community to decide whether the proposed public interest framework can be used to demonstrate how specific recommendations, advice and public comments are in the global public interest." This session will provide more information and seek feedback about the public interest framework, how it is evolving, and how such a tool should be used by the community in their activities/initiatives to further ICANN's mission.

## 4 ICANN Accountability and Transparency and the ICANN Reviews (ALAC)

This proposal aims to both explore the ATRT3 recommendations regarding Reviews and the Board approval of the ATRT3 Final Report as well as expand the understanding of the perspectives of all ICANN Constituencies on the implementation of the recommendations.

## 5 How to Design Inclusive, Equitable Hybrid ICANN Meetings (GAC)

This would be an open discussion with all SO/ACs participants (and others) on how we can ensure that the new hybrid meeting format promotes values of inclusivity and diversity. Issues to discuss may include how to ensure virtual participation is treated on par with physical participation, what opportunities hybrid meetings could provide to bolster diversity at ICANN, and how we can ensure diversity in active participation across regions, genders and stakeholder groups.

## 6 GDPR / WHOIS Data: What is Next? (GAC)

An opportunity to discuss (holistically, and outside of the current policy development processes), current issues in the field of data protection relating to WHOIS data including new developments in the field of data protection including NIS2 and the Digital Services Act, the upcoming launch of the SSAD and ongoing work to improve the accuracy and availability of WHOIS data.

## ICANN72 Plenary Session Planning

---

Week of 30 August	Coordination <ul style="list-style-type: none"><li>- Assemble planning teams</li><li>- Confirm program participants</li></ul>
Week of 6 September	Planning Call #1
Week of 13 September	Planning Call #2
Week of 20 September	Planning Call #3
Week of 27 September	Planning Call #4
Week of 4 October	Planning Call #5
Week of 11 October	ICANN72 Prep Week (Planning Call #6, if necessary)
Week of 18 October	Dry Run
<b>Week of 25 October</b>	<b>ICANN72 Virtual AGM</b>

# ICANN72 Draft Block Schedule

DRAFTv2.2

BLOCK	PDT (UTC-7)	UTC	MON	TUES	WED	THUR
			25 OCT	26 OCT	27 OCT	28 OCT
