

## **Workshop Proposal 1**

### Pre-event of Main Session:

Main conference Session (Jul 1-3)

### Workshop title:

Asia Pacific Internet Leadership Program (APILP) – Day 1 – (General) Overview of Internet Governance – History and Current global development. Emerging issues.

### Specific Issues of Discussion and Description:

Close to half of the world's 3 billion internet users are now in the Asia Pacific region, and there's no guessing where most of the next billion is going to come from. Hear from the region's renowned speakers on a wide range of issues: What is Internet Governance? What are the key milestones that have shaped the world's thinking on Internet Governance? What is the Internet really and how does it work? Who runs the Internet now and what is at stake here? Why should you care?

Day 1 covers general Internet Governance issues such as Overview of Internet Governance – History and Current global development, as well as emerging issues. This session will help you better understand the key drivers and important milestones in the world of Internet Governance past, present and beyond.

### More about APILP

The Asia Pacific Internet Leadership Program (APILP) seeks to develop the Asia Pacific region's Internet governance leaders of tomorrow. The program is expected to help professionals and youth from the Asia Pacific region better understand the global and regional Internet Governance issues and processes.

This series of workshops will spread over the 3 conference days as a capacity building component of APrIGF. The workshops should complement the sessions at the main conference and provide participants with background information and resources to key themes of the APrIGF 2015.

Format: Classroom

Duration : 45mins

Speaker: Prof Ang Peng Hwa, SIRC(NTU)

## **Workshop Proposal 2**

### Pre-event of Main Session:

Main conference Session (Jul 1-3)

### Workshop title:

APILP (Asia Pacific Internet Leadership Program) - Day 2 - (Technical) Domain Name System; Critical Internet Resources

### Specific Issues of Discussion and Description:

Day 2 of the APILP covers technical topics on the Domain Name System; Critical Internet Resources (IP addresses, IPv4/6). Have a question on how the Internet works, what goes into the addressing system of the Internet; and what are the challenges in maintaining a single, stable and secure Internet? This session will provide a concise background on the workings and backbone of the Internet resources.

Format: Classroom

Duration : 45mins

Speaker: Paul Wilson, APNIC

### **Workshop Proposal 3**

#### Pre-event of Main Session:

Main conference Session (Jul 1-3)

#### Workshop title:

APILP (Asia Pacific Internet Leadership Program) – Day 3 – (Emerging Issues) IANA Stewardship Transition (TBC)

### Specific Issues of Discussion and Description:

Day 3 of the APILP provides the background to and updates on the IANA Stewardship Transition that have started since the announcement by the US Government on the transition of key Internet domain name functions to the global multistakeholder community. This session will update the community on the community-led effort, as well as the proposals/comments that have come in for the two parallel tracks of IANA Stewardship Transition and Enhancing ICANN's Accountability.

Format: Classroom

Duration : 45mins

Speaker: Kuek Yu-Chuang, ICANN
