

Name

Dr. Abdulkarim Oloyede

Affiliation and Current Position

Researcher and Lecturer, Department of Telecommunications Science, University of Ilorin. (I am currently a Comment Research Fellow at the University of York.)

Relevant Qualifications

- B. Engr(Electrical Engineering),
- M.sc (Telecommunications),
- PhD (Telecommunications),

Motivation

I teach Internet Protocol to Students at the University of Ilorin, Nigeria and I also carry out some research on the Internet workings and I think this would me contribute more while I also get to learn. I am a first-time fellow at ICANN 61 in San Juan and I got more interested in RSSAC. I am also attending IETF 101 in London as an ISOC Fellow and I hope that being part of RSSAC would help me in keeping things going. I have a good Knowledge of the working od DNS but I have never worked on a DNS server. I think we need more people from developing countries participating actively and since I have a good background I want to take a lead on this.

Indication of Availability

I am available to attend online and face to face meetings. My plan is to be an active member and participate in the working group. I am also attending a lot of the RSSAC meetings in ICANN61.

Formal Roles

N/A
