

## Statement of Interest for RSSAC Caucus

**Name:**

Jack Biesiadecki

**Affiliation:**

NTT Data, NASA Ames Research Center

**Relevant qualifications:**

In my previous work experience I worked on researching TCP/UDP IP packet optimization and simulation for bandwidth intensive teleoperation over hi-latency low bandwidth links. I have also supported the rollout of IPv6 on NASA public facing servers.

**Motivation for membership in the RSSAC Caucus:**

In my new role I will be supporting E-Root and I am interested in ensuring that E-Root is operating within RSSAC recommendations and guidelines. I am also interested in emerging technologies in relation to increasing maintenance efficiency, the security posture and performance of Root Servers while increasing access.

**Indication of Availability:**

- I am available to collaborate on caucus technical documents
- I am available for RSSAC teleconferences and F2F meetings
