

Name

João Luis Silva Damas

Affiliation and current position

Bond Internet Systems

Relevant qualifications

Root server operator 1997-2013
DNS software development (BIND)
Researcher of DNS server operations

Motivation for membership in the Caucus

My main motivation is the continuation of work towards maintaining and increasing the level of stability and resilience in the root server system. I am willing and available to work on documents related to root name server operations and operational requirements as well as anything related to outreach. My personal goals for RSSAC work products are relevance, timeliness, and professionalism.

Indication of availability

I can work on RSSAC documents for about 8 hours/month and will be available for most caucus meetings, remotely or physically.

Formal roles and interests in the work of RSSAC

Presently no formal roles

Was responsible for f.root-servers.net while at ISC, including active participation with colleagues in RSSAC and other organisational and governance issues around the root server system.

Directed the creation of ISC-TN-2003-1, ISC-TN-2004-1 so that there would be a written record of how F-root was being anycasted for other people to see.

I am one of the root zone KSK trusted community representatives.
