Statement of Interest for RSSAC Caucus

Name: Suresh Krishnaswamy

Affiliation(s): ICANN Research Fellow,
Senior Security Engineer, Parsons

Relevant qualifications:
- Research Fellow at ICANN
- Over 15 years of professional experience in the area of Internet infrastructure security and protocol development.
- Early participant in the DNSSEC-related standards development process
- Developer of DNS and DNSSEC related software tools and libraries
- Developer of tools and resources for facilitating the deployment of Routing Security enhancements
- Part time Ph.D student at George Mason University, School of Public Policy.

Motivation
I currently assist ICANN in conducting research that is relevant to ICANN's mission, including supporting projects in the SSAC and RSSAC. I also have a keen interest in technology policy and am particularly interested in the security, stability, and adoption aspects of Internet infrastructure technologies such as DNSSEC, having worked in this technology area for more than a decade.

Availability
I anticipate being able to participate in RSSAC related activities for up to 10 hours a week, based on the needs of ICANN and the RSSAC.
