

Name

Matt Weinberg

Affiliation and Current Position

Verisign; Senior Manger, Global Infrastructure Services

Relevant Qualifications

I currently manage the team that operates Verisign's DNS server infrastructure. Verisign operates both A-root and J-root, and also serves as the Root Zone maintainer. I've worked at Verisign for over three years and have been involved with DNS server administration for years prior.

Motivation for Membership in the Caucus

I had the opportunity to be a guest at the RSSAC caucus in Toronto. I'm interested in the committee's efforts and would like to participate in on-going discussions and decisions. I will also serve as a backup to Brad Verd's capacity within RSSAC.

Indication of Availability

I will be available to participate in person at all RSSAC meetings. I can also help via email.

Formal Roles and Interests in the Work of RSSAC

I've been exposed to the RSSAC 001 and 002 documents in my capacity as a Root Server Operator. I'm interested and available in helping the RSSAC committee finalize these documents.
