

Name

Nichole Boscia

Affiliation & Current Position

San Jose State University Research Foundation (Co-Operative Agreement with NASA Ames Research Center), Sr. DevOps Engineer

Relevant Qualifications

Almost 20 years in professional IT experience at NASA including:

- Network Engineering & Design
- Security Engineering
- DevOps
- System Administration
- Software Engineering

I also operated site-level NASA DNS servers, leading the way for IPv6 transition, and am an E-Root Operator.

Motivation

I love being involved and giving input to ideas that can improve any system from security, to performance, to research initiatives. I want to help make technologies and systems more architecturally reliable, functional, and add new or improved features.

Indication of Availability

I am available to work 4-6 hours per month on RSSAC work, plus more if needed.

Formal roles

I have no previous relationship with the RSSAC.
