- **Name:** Hugo Salgado ([hsalgado@nic.cl](mailto:hsalgado@nic.cl))
- **Affiliation and current position:** NIC Chile – Research and Development Engineer
- **Relevant qualifications:**
  - I have been working for 22 years in NIC Chile, the .CL ccTLD registry and registrar; in roles related to operations, development, and research. I have participated in IDN, anycast and DNSSEC projects.
  - I regularly participate in IETF meetings and currently have an adopted draft at DNSOP on a diagnostic tool for zones.
  - At the regional level, I actively participate in the LACTLD technical group, and I am part of the anycast DNS cloud administration group for the ccTLDs that are members of LACTLD.
  - In recent years, in my research work, I have carried out various studies and measurements of the status of the DNS, both at the root level, as well as local infrastructures such as the LACTLD anycast cloud and the status of the reverse zones of the LACNIC RIR.
- **Motivation for membership in the RSSAC Caucus:**

I am interested in the stability and future of the DNS for the benefit of a single Internet. I believe that I can cooperate with measurements and analysis as part of my work in DNS Research, and contribute to the review and comments of documents on infrastructure and operation.
- **Indication of availability:**

My employer gives me his support to dedicate a time load of approximately 5 hours of weekly work, and depending on the particular project, it could be increased as necessary. I commit to participate in all remote meetings, and attend 1 annual meeting in person (I usually attend a couple of IETFs a year).

- **Formal roles (if any) and interests in the work of RSSAC:**

- Full-time employee at NIC Chile (.CL)
- Chair of DNS working group in LACNOG
