

Statement of Interest

Name: Ali Hussain

Affiliation and current position: Student at University of Malaya

Relevant qualifications: I am doing Masters in Computer Science with specialization in Cloud Computing and data protection. I started studying DNS and DNSSEC back in 2012 and have been following these topics round the globe since then. I have attended DNSSEC workshops in SANOG27 and ICANN60. I have attended IETF103. These days I am working on RDAP implementation project which is funded by APNIC(ISIF ASIA Grant). I am also observer member of RDS-WHOIS2 review team too.

.

Motivation for membership in the RSSAC Caucus: I have strong interest in contributing the development and implementation of Internet and its protocols especially DNS and DNSSEC. ICANN60 was my first ICANN engagement in person. NextGen program help me develop contacts and relationships with ICANN staff and also name new acquaintances in IP address, Domain Name and Internet Governance experts. It strengthens my understanding about the diversity and multistakeholder. On joining this RSSAC Caucus

Indication of availability: I am very flexible to attend online meetings but circumstances permit I would also like attend in person caucus meetings.

Formal roles (if any) and interests in the work of RSSAC: I am interested to work in the RSSAC domain for greater support for internationalization domains and root servers physical location for better performance in all regions.
