Name: Matt Larson, CTO, Dyn, Inc.

About me:

www.linkedin.com/pub/matt-larson/2/271/2/

Relevant qualifications:

- DNS operator since the late 1980s
- Multiple DNS-related technical roles over 13 years at Verisign, operator of the .com and .net registries, the "A" and "J" root servers, and performer of the Root Zone Maintainer role
- Represented Verisign in the private root operator group and a member of RSSAC for 13 years
- Vice-chair of RSSAC in its former instantiation for several years
- Co-author of DNSSEC RFCs 4033, 4034 and 4035
- Author of O'Reilly Nutshell handbooks "DNS on Windows NT", "DNS on Windows 2000" and "DNS on Windows Server 2003".
- Co-host of the Ask Mr. DNS podcast

Motivation for membership in the Caucus:

I am interested to offer my experience to improve the root server system and to continue to participate in its evolution.

Indication of availability:

I can devote eight hours per month to write or edit documents. I typically attend one to two IETF meetings per year, and could attend one ICANN meeting per year, if necessary.

Formal roles and interests in the work of RSSAC:

- CTO of Dyn, Inc., an Internet Performance company offering DNS-based traffic management services to the leading brands in the Alexa 1000
- Member of SSAC
