

## Statement of Interest for RSSAC Caucus

**Name:** Suzanne Woolf

**Motivation:** I have worked for 15+ years on various topics related to the security and stability of Internet infrastructure, particularly policy, protocol, and operations around DNS names and IP addresses. I am interested in supporting and extending resiliency, scalability, and transparency in the operations of those systems. RSSAC is in a unique position to promote collaboration between root server operators and others interested in those attributes of the internet infrastructure, with the caucus as the primary mechanism for open, technically informed, effective discussions and recommendations.

### **Indication of availability, not a formal commitment:**

Currently 7-10 hours per week total for RSSAC business, up to 20 including my current role as RSSAC liaison to the ICANN Board of Directors.

**About me:** <https://www.linkedin.com/pub/suzanne-woolf/31/b77/98>

### **Relevant Qualifications:**

- Tech support for IANA mid 1990s, including DNS root zone/root server support
- Root server operator since 1999 (L-root, F-root)
- Founding member of RSSAC
- RSSAC liaison, ICANN Board, 2006-; advised on various projects around root DNSSEC, IDN deployment, root zone and operations scalability, etc.
- ISC F-root policy team 2002-2014
- DNS-OARC Board of Directors, 2009-2013
- IETF DNSOP WG co-chair, 2013-
- Involved in "internet governance" in various capacities from pre-ICANN days (approx. 1997 onward)
