LAC i RoadShow

The LAC-i-Roadshow is one of the projects of the LAC Strategy, a strategy that was developed by the different stakeholder groups represented at ICANN from the LAC region. It is designed to raise awareness across the region on key topics related to the DNS critical infrastructure such as the transition to IPv6, SSR (Security, Stability and Resiliency) and the impact of the new gTLD program. To ensure a well distributed set of events there will be four editions of the LAC-i-Roadshow per year: The Caribbean; Andean Region, Mexico and Central America and South America. Each event of the LAC-i-Roadshow will be led by local champions on each of the subjects complementing their expertise with other experts from the region when appropriate.

WHEN
Friday, 25th April 2014
from 08:30 to 16:00

WHERE
Trinidad & Tobago
Hilton hotel

AGENDA

TIME	TOPIC
8:30 to 10:30	**Multistakeholder Model**

US Government NTIA Announcement and the work of ICANN
The CTU Internet Governance Forum and Caribbean Coordination
   • "Become an ICANN Registrar" - a unique business opportunity
   • Impact of the new gTLD program
Panel Discussion:
   • Participating in the multistakeholder framework at ICANN meetings

| 10:45 to 12:45 | **Security Stability and Resiliency (SSR) of the Domain Name System (DNS)** |

Internet Security in the Caribbean - Update
DNS Security
DNS SSR in a ccTLD
What does "DNS Resiliency" mean?
Panel Discussion & Questions

| 14:00 to 16:00 | **Internet Protocol Version 6 (IPv6)** |

IPv4 transition to IPv6
IPv6 deployment, an ISPs perspective
Security Implications of IPv6
Panel Discussion & Questions
